| C95087   | DD                     | Death Details;Death Diagnosis and Details | A findings domain that contains the diagnosis of the cause of death for a subject.   | Death Diagnosis Domain                 |
| C102616  | DE                     | Device Events                             | An events domain that contains data for device-related events.   | Device Events Domain                   |
| C102618  | DI                     | Device Identifiers                        | A special-purpose domain containing information that identifies a specific device unit.  | Device Identifiers Domain              |
| C49572   | DM                     | Demographics                              | A special-purpose domain that includes a set of essential standard variables that describe each subject in a clinical study. It is the parent domain for all other observations for human clinical subjects.                 | Demographics Domain                    |
| C102619  | DO                     | Device Properties                         | A findings domain that contains the device characteristics that do not vary over the course of the study.  | Device Properties Domain               |
| C102620  | DR                     | Device-Subject Relationships              | A special-purpose domain that contains the linkage of each subject to the device(s) to which they may have been exposed during the study.  | Device to Subject Relationship Domain  |
| C49576   | DS                     | Disposition                               | An events domain that contains information encompassing and representing data related to subject disposition.  | Disposition Domain                     |
| C102621  | DT                     | Device Tracking and Disposition           | A events domain that contains the logistics and disposition information specific to a given device.  | Device Tracking and Disposition Domain |
| C102622  | DU                     | Device In-Use                             | A findings domain that contains the measurements and settings that are intentionally set on a device when it is in use. These are characteristics that exist for the device, and have a specific setting for a use instance. | Device-In-Use Domain                   |
| C49585   | DV                     | Protocol Deviations                       | An events domain that contains protocol violations and deviations during the course of the study.  | Protocol Deviations Domain             |
| C102617  | DX                     | Device Exposure                           | An interventions   | Device Exposure Domain                 |

| C66734   |                        | DOMAIN                                 |   |   |  |

### DSCAT (Category of Disposition Event)

NCI Code: C74558, Codelist extensible: No

| C74558   |                        | DSCAT              |  |                                |
|----------|------------------------|--------------------|--|--------------------------------|
| NCI Code | CDISC Submission Value | CDISC Synonym      | CDISC Definition   | NCI Preferred Term             |
| C74590   | DISPOSITION EVENT      | Disposition Event  | The group of incidents that occur during a clinical trial and describe whether a subject completed the study epoch or the reason this event did not occur. The subject's disposition is often described for each phase of the study. | Protocol Disposition Event     |
| C150824  | OTHER EVENT            | Other Event        | Other important events that occur during a trial but are not driven by protocol requirements.  | Non-Protocol Disposition Event |
| C74588   | PROTOCOL MILESTONE     | Protocol Milestone | Occurrences within some epochs that are initiated by a protocol-specified event. The most common protocol milestone is "Informed Consent Obtained" which usually documents the start of the study.                                   | Protocol Milestone             |

**DSPRTYP (Disease Presentation Type)**

NCI Code: C127268, Codelist extensible: Yes

| C127268  |  | DSPRTYP       |  |                         |
|----------|--|---------------|--|-------------------------|
| NCI Code | CDISC Submission Value                     | CDISC Synonym | CDISC Definition   | NCI Preferred Term      |
| C127606  | COMPLEX CYSTIC LESION                      |               | A lesion that demonstrates both cystic and solid components; the solid components can range from thin walls (septae) to a solid tissue mass.                                   | Complex Cystic Lesion   |
| C3003    | EFFUSION                                   |               | Abnormal collection of fluid in a body cavity.   | Effusion                |
| C2885    | INCREASING ABDOMINAL DISTENTION OR ASCITES | Ascites       | Abnormal collection of fluid in the peritoneal cavity.   | Ascites                 |
| C4958    | LEPTOMENINGEAL DISEASE                     |               | A malignant neoplasm that has spread from its original site to the arachnoid mater and the pia mater, the two innermost layers of tissue that cover the brain and spinal cord. | Leptomeningeal Neoplasm |

**DSSCAT (Subcategory for Disposition Event)**

NCI Code: C170443, Codelist extensible: Yes

| C170443  |                        | DSSCAT        |   |                                     |
|----------|------------------------|---------------|---|-------------------------------------|
| NCI Code | CDISC Submission Value | CDISC Synonym | CDISC Definition  | NCI Preferred Term                  |
| C170569  | STUDY PARTICIPATION    |               | The act of taking part in a study.                        | Study Participation                 |
| C170570  | STUDY TREATMENT        |               | The act of taking part in the treatment phase of a study. | Study Treatment Phase Participation |

**DSSOUT (Disease Outcome)**

NCI Code: C102578, Codelist extensible: Yes

| C102578  |                         | DSSOUT            |  |                         |
|----------|-------------------------|-------------------|--|-------------------------|
| NCI Code | CDISC Submission Value  | CDISC Synonym     | CDISC Definition   | NCI Preferred Term      |
| C102600  | BACTERIOLOGICAL CURE    |                   | There are no indicators of bacterial infection in an individual who previously had an infection. | Bacteriological Cure    |
| C102601  | BACTERIOLOGICAL FAILURE |                   | There are indicators of bacterial infection in the individual who previously had an infection.   | Bacteriological Failure |
| C102607  | CLINICAL CURE           |                   | There are no signs or symptoms of disease in the individual who previously had a disease.        | Clinical Cure           |
| C102608  | CLINICAL FAILURE        |                   | There are still signs or symptoms of disease in the individual who previously had an infection.  | Clinical Failure        |
| C38155   | RECURRENT DISEASE       | Recurrent Disease | The return of a disease after a period of remission.   | Recurrent Disease       |

**DTDECOD (Device Tracking and Disposition Event Dictionary Derived Term)**

NCI Code: C112037, Codelist extensible: Yes

| C112037 DTDECOD |                        |               |   |                              |
|-----------------|------------------------|---------------|---|------------------------------|
| NCI Code        | CDISC Submission Value | CDISC Synonym | CDISC Definition  | NCI Preferred Term           |
| C101231         | DEPLOYED               |               | The act of instantiating, positioning or activating a medical device inside of the body.  | Medical Device Deployment    |
| C112270         | DESTROYED              |               | A finding referring to a product that has been demolished.  | Destroyed Medical Device     |
| C114146         | EXPLANTED              |               | A status indicating that a device is removed from a surgically or naturally formed cavity of the human body.  | Explanted Medical Device     |
| C80457          | IMPLANTED              |               | A status indicating that a device is placed into a surgically or naturally formed cavity of the human body.   | Implanted Medical Device     |
| C117758         | INTENDED BUT NOT USED  |               | A status indicating that a device was introduced to the subject for use but did not meet its intended goal and was removed. (NCI)                     | Device Intended But Not Used |
| C112329         | LOST                   |               | A finding referring to a product that is no longer held or possessed; incapable of being recovered or regained.                                       | Lost Medical Device          |
| C25639          | RECEIVED               |               | Coming into possession of or acting as the receptacle or recipient of an item conveyed by an intermediary to the intended destination, from a sender. | Receive                      |
| C40353          | SHIPPED                |               | Being transported or conveyed by an intermediary to a destination, from the sender to the intended receiver.  | Shipping                     |

**DTHDX (SDTM Death Diagnosis and Details Test Name)**

NCI Code: C116107, Codelist extensible: Yes

| C116107  |                                       | DTHDX   |  |                                       |

**DURS (Device-In-Use Response)**

NCI Code: C129938, Codelist extensible: Yes

| C129938  |                                 | DURS                               |   |  |
|----------|---------------------------------|------------------------------------|---|--|
| NCI Code | CDISC Submission Value          | CDISC Synonym                      | CDISC Definition  | NCI Preferred Term                         |
| C130058  | 2-DIMENSIONAL BIPLANE MODE      |                                    | An ultrasound imaging setting that uses a probe with two 2-dimensional (2D) planes set perpendicularly to each other, allowing for better detection and localization of objects/structures.       | 2-Dimensional Biplane Ultrasound Mode      |
| C130059  | 2-DIMENSIONAL SINGLE PLANE MODE |                                    | An ultrasound imaging setting that uses a linear pattern of beams to produce a standard, 2-dimensional (2-D) image.   | 2-Dimensional Single Plane Ultrasound Mode |
| C130060  | 3-DIMENSIONAL MODE              |                                    | An ultrasound imaging setting that reconstructs planar ultrasound data into three dimensional images of the structure being scanned.  | 3-Dimensional Ultrasound Mode              |
| C130061  | COLOR TISSUE DOPPLER MODE       | Color Flow Tissue Doppler Mode     | An ultrasound imaging setting that uses pulsed wave Doppler signals to depict tissue motion direction and velocity in color images that are superimposed over normal, 2-dimensional (2-D) images. | Color Tissue Doppler Ultrasound Mode       |
| C130062  | CONTINUOUS-WAVE DOPPLER MODE    | Continuous Doppler Mode;CW Doppler | An ultrasound imaging setting that uses Doppler signals that are continuously sent and received along a single line to measure both direction and velocity of blood flow.                         | Continuous-Wave Doppler Ultrasound Mode    |
| C130063  | M-MODE                          | Motion Mode                        | An ultrasound imaging setting that uses a single ultrasound beam to provide high temporal resolution of tissue motion.  | M-Mode Ultrasound Mode                     |
| C130064  | PULSED-WAVE DOPPLER MODE        | Pulsed Doppler Mode;PW Doppler     | An ultrasound imaging setting that uses intermittent Doppler signals to measure both direction and velocity of blood flow.  | Pulsed-Wave Doppler Ultrasound Mode        |
| C130065  | PULSED-WAVE TISSUE DOPPLER MODE | Pulsed Tissue Doppler Mode         | An ultrasound imaging setting that uses pulsed wave Doppler signals to measure velocity of tissue movement.   | Pulsed-Wave Tissue Doppler Ultrasound Mode |
| C130066  | TISSUE DOPPLER MODE             |                                    | An ultrasound imaging setting that uses intermittent Doppler signals to measure velocity of tissue movement.  | Tissue Doppler Ultrasound Mode             |

## DUTEST (Device-In-Use Test Name)

NCI Code: C106482, Codelist extensible: Yes

| C106482  |                                       | DUTEST                                |  |  |
|----------|---------------------------------------|---------------------------------------|--|--|
| NCI Code | CDISC Submission Value                | CDISC Synonym                         | CDISC Definition   | NCI Preferred Term                           |
| C102516  | Anatomical Plane                      | Anatomical Plane                      | The position and orientation of the image slice relative to the patient-based coordinate system. (NCI)   | Image Plane                                  |
| C94862   | Attenuation Correction Type           | Attenuation Correction Type           | The adjustment for the effect of tissue thicknesses through which gamma's travel from an activity concentration origin to the scanner's detectors. The count rates of a detector are adjusted to values as if there were no attenuation along the gamma's path. This makes possible accurate quantitation in image analysis. (NCI) | Attenuation Correction                       |
| C163418  | Carbohydrate to Insulin Ratio Setting | Carbohydrate to Insulin Ratio Setting | A setting on a device that specifies the ratio of the carbohydrates to insulin in the administered product.  | Carbohydrate to Insulin Ratio Device Setting |
| C117759  | Checkerboard Square Size              | Checkerboard Square Size              | A visual stimulus that uses a checkerboard pattern which reverses every half-second (or other specified frequency). The check size can be changed to allow for testing of specific segments of the visual pathway.   | Checkerboard Square Size                     |
| C106510  | Coil Strength                         | Coil Strength                         | The maximum voltage allowable to pass through an electromagnetic coil. (NCI)   | Coil Strength                                |
| C142236  | Continuous Audio Recording Indicator  | Continuous Audio Recording Indicator  | An indication as to whether a continuous audio recording is made during the assessment.  | Continuous Audio Recording Made Indicator    |
| C116127  | Decay Correction Indicator            | Decay Correction Indicator            | An indication as to whether the image reconstruction took into account the time-activity curve during which the radiolabeled tracer decayed as it spread through the body during the image acquisition.  | Decay Correction Indicator                   |
| C82331   | Echo Time                             | Echo Time                             | The time in milliseconds between the application of the excitation pulse and the recording of the peak echo signal. (NCI)  | Echo Time                                    |
| C74298   | Field of View                         | Field of View                         | The extent of an area that is visible. (NCI)   | Field of View                                |
| C73792   | Flip Angle                            | Flip Angle                            | In magnetic resonance imaging, the rotation of the average axis of the protons, relative to the main magnetic field direction, induced by radiofrequency signals. (NCI)  | Flip Angle                                   |
| C170566  | Glucose Alert Threshold               | Glucose Alert Threshold               | A setting on a device that triggers the onset of an alarm when a pre-specified value of glucose level has been reached.  | Glucose Alert Threshold                      |
| C170565  | Glucose Target Level                  | Glucose Target Level                  | A setting on a device where one can set and adjust the target  | Glucose Target Level                         |

| C106482 DUTEST |                                       |  |  |   |

| C116126        | Image Acquisition Dimensionality      | Image Acquisition Dimensionality   | value of blood glucose level.<br>The number of dimensions that the acquired image(s) are presented in.   | Image Acquisition Dimensionality          |
| C106533        | Image Acquisition Matrix Size         | Image Acquisition Matrix Size  | A measurement of the number of data fields, pixels or data points assigned to each linear dimension in a digital image. (NCI)  | Image Acquisition Matrix Size             |
| C116122        | Image Weighting Type                  | Image Weighting Type   | A classification of the technique used to enhance image contrast based on differences in magnetic resonance tissue properties. This can be achieved by changing the echo time or repetition time after the tissue has returned to its equilibrium state. | Image Weighting Type                      |
| C172482        | Insulin Delivery Automation Mode      | Insulin Delivery Automation Mode   | The setting on a device that will allow the delivery of insulin to a subject, either automatically or manually, in response to the glucose levels within the subject. (NCI)  | Insulin Delivery Automation Mode          |
| C116123        | Interslice Distance                   | Interslice Distance  | A measurement of the distance between slices within an image sequence, calculated by subtracting the nominal slice thickness from the couch increment.   | Interslice Distance Measurement           |
| C116124        | Inversion Time                        | Inversion Time   | The time between the inversion and excitation pulses in an inversion recovery pulse sequence.  | Inversion Time                            |
| C165872        | Maximum Bolus                         | Max Bolus;Maximum Bolus  | A setting and safety feature on a device to control the maximum amount of a substance delivered in a single bolus.   | Maximum Bolus Device Setting              |
| C172483        | Missed Bolus Reminder Status          | Missed Bolus Reminder Status   | The status of a setting that enables alerts if a bolus is not delivered during a pre-specified time period. (NCI)  | Missed Bolus Reminder Status              |
| C112364        | Number of Coil Channels               | Number of Coil Channels  | The number of channels, or elements, in the coil component of the device.  | Number of Coil Channels                   |
| C154906        | Number of ECG Electrodes              | Number of ECG Electrodes;Number of EKG Electrodes;Number of Electrocardiogram Electrodes | The number of electrocardiogram electrodes used in the assessment.   | Number of Electrocardiogram Electrodes    |
| C154713        | Number of EEG Electrodes              | Number of EEG Electrodes;Number of Electroencephalogram Electrodes                       | The number of electroencephalogram electrodes used in the assessment.  | Number of Electroencephalogram Electrodes |
| C154908        | Number of EMG Electrodes              | Number of Electromyogram Electrodes;Number of EMG Electrodes                             | The number of electromyogram electrodes used in the assessment.  | Number of Electromyogram Electrodes       |
| C154907        | Number of EOG Electrodes              | Number of Electrooculogram Electrodes;Number of EOG Electrodes                           | The number of electrooculogram electrodes used in the assessment.  | Number of Electrooculogram Electrodes     |
| C116125        | Number of Slices                      | Number of Slices   | The number of planar cross-sections in an imaging sequence; each slice corresponds to a single image.  | Number of Slices                          |
| C156495        | Number of Unsuppressed Water Averages | Number of Unsuppressed Water Averages  | The number of averages of the unsuppressed water spectrum signal that are captured during  | Number of Unsuppressed Water Averages     |

| C106482 DUTEST |                                 |                                 |  |                                 |
|----------------|---------------------------------|---------------------------------|--|---------------------------------|

| C142237        | Pulse Oximeter Indicator        | Pulse Oximeter Indicator        | imaging.<br>An indication as to whether a pulse oximeter is used in the assessment.  | Pulse Oximeter Use Indicator    |
| C106562        | Pulse Sequence                  | Pulse Sequence                  | A serially recurrent arrangement of radiofrequency pulses that are applied to the sample. (NCI)  | Pulse Sequence                  |
| C116128        | Randoms Correction Indicator    | Randoms Correction Indicator    | An indication as to whether the device was set to correct for random noise generated by deflected positrons.   | Randoms Correction Indicator    |
| C106563        | Receiver Bandwidth              | Receiver Bandwidth              | The range between the minimum and maximum cut-off frequencies for a particular receiver, commonly measured in Hertz. (NCI)   | Receiver Bandwidth              |
| C106564        | Reconstruction Filter Type      | Reconstruction Filter Type      | A classification of the reconstruction filter used to suppress noise, enhance edges, resolution recovery and smooth an image.  | Reconstruction Filter Type      |
| C111303        | Reconstruction of Raw Data Type | Reconstruction of Raw Data Type | The type of mathematical process used to produce the displayed image from the raw k-space data obtained from the receiver circuitry. (NCI)   | Reconstruction of Raw Data Type |
| C154716        | Reference Equation              | Reference Equation              | A mathematical formula to predict measured outcomes based on values of associated parameters determined to be related to a test. Reference equations are typically derived via regression analysis of parameters postulated to be relevant to the outcome over sample cohorts from large populations, and verified by comparing measured outcomes to predictions over out-of-sample cohorts. | Reference Equation              |
| C82330         | Repetition Time                 | Repetition Time                 | The amount of time in milliseconds between successive pulse sequences applied to the same slice.   | Repetition Time                 |
| C112416        | Signal Amplitude                | Signal Amplitude                | A measurement of the height of the signal.   | Signal Amplitude                |
| C112417        | Signal Frequency                | Signal Frequency                | A measurement of the number of cycles of a periodic wave or pulse per unit of time.  | Signal Frequency                |
| C112418        | Signal Width                    | Signal Width                    | A measurement of the range of values seen in the time interval between the beginning and end of the pulse wave.  | Signal Width                    |
| C111314        | Slice Number                    | Slice Number                    | The numeric identifier used to identify an image slice. (NCI)  | Slice Number                    |
| C106534        | Slice Thickness                 | Slice Thickness                 | The dimension between two surfaces of an imaging plane. (NCI)  | Image Slice Thickness           |
| C111093        | Software Version                | Software Version                | A form or variant of software; one of a sequence of copies of a software program, each incorporating new modifications.  | Software Version                |

| C106482 DUTEST |                                  |   |  |                                       |
|----------------|----------------------------------|---|--|---------------------------------------|
| NCI Code       | CDISC Submission Value           | CDISC Synonym   | CDISC Definition   | NCI Preferred Term                    |
| C156496        | Spectral Width                   | Spectral Width  | (NCI)<br>The width of the wavelength interval at half maximum amplitude.   | Spectral Width                        |
| C156501        | STEAM Pulse Sequence Mixing Time | STEAM Pulse Sequence Mixing Time; Stimulated Echo Acquisition Mode Pulse Sequence Mixing Time | The time elapsed between the second and third pulses of the stimulated echo acquisition mode (STEAM) pulse sequence.   | STEAM Pulse Sequence Mixing Time      |
| C114145        | Stimulation Parameter            | Stimulation Parameter   | The type of electrode (monopolar or bipolar) used on the subject during electrical stimulation of the body or organ.   | Electrical Stimulation Electrode Type |
| C158156        | Treatment Amount                 | Treatment Amount  | The concentration or quantity of the treatment.  | Treatment Amount                      |
| C130045        | Ultrasound Mode                  | Ultrasound Mode   | The image acquisition settings of an ultrasound-based imaging modality, based on parameters including transducer design, ultrasound frequency, and ultrasound signal processing. | Ultrasound Mode                       |
| C156500        | Voxel Orientation                | Voxel Angle; Voxel Orientation  | The angle of the voxel relative to the coordinate system of the scanner.   | Voxel Orientation                     |
| C156661        | Water Signal Suppression Method  | Water Signal Suppression Method   | The technique used to mitigate the signal that is generated from body water during imaging.  | Water Signal Suppression Method       |
| C69201         | X-axis Pixel Spacing             | X-axis Pixel Spacing  | A measurement of the distance between the centers of two adjacent pixels located along the X-axis.   | Horizontal Pixel Spacing              |
| C156497        | X-Axis Voxel Dimension           | X-Axis Voxel Dimension  | The linear measurement of a voxel along the X-axis.  | X-Axis Voxel Dimension                |
| C69210         | Y-axis Pixel Spacing             | Y-axis Pixel Spacing  | A measurement of the distance between the centers of two adjacent pixels located along the Y-axis.   | Vertical Pixel Spacing                |
| C156498        | Y-Axis Voxel Dimension           | Y-Axis Voxel Dimension  | The linear measurement of a voxel along the Y-axis.  | Y-Axis Voxel Dimension                |
| C156499        | Z-Axis Voxel Dimension           | Z-Axis Voxel Dimension  | The linear measurement of a voxel along the Z-axis.  | Z-Axis Voxel Dimension                |

**DUTESTCD (Device-In-Use Test Code)**

| C106564          | RCFLTRTP               | Reconstruction Filter Type      | A classification of the reconstruction filter used to suppress noise, enhance edges, resolution recovery and smooth an image.  | Reconstruction Filter Type      |  |
| C111303          | RECONDAT               | Reconstruction of Raw Data Type | The type of mathematical process used to produce the displayed image from the raw k-space data obtained from the receiver circuitry. (NCI)   | Reconstruction of Raw Data Type |  |
| C154716          | REFEQU                 | Reference Equation              | A mathematical formula to predict measured outcomes based on values of associated parameters determined to be related to a test. Reference equations are typically derived via regression analysis of parameters postulated to be relevant to the outcome over sample cohorts from large populations, and verified by comparing measured outcomes to predictions over out-of-sample cohorts. | Reference Equation              |  |
| C82330           | REPTIME                | Repetition Time                 | The amount of time in milliseconds between successive pulse sequences applied to the same slice.   | Repetition Time                 |  |
| C111093          | SFTWRVER               | Software Version                | A form or variant of software; one of a sequence of copies of a software program, each incorporating new modifications. (NCI)  | Software Version                |  |
| C112416          | SIGAMP                 | Signal Amplitude                | A measurement of the height of the signal.   | Signal Amplitude                |  |
| C112417          | SIGFREQ                | Signal Frequency                | A measurement of the number of cycles of a periodic wave or  | Signal Frequency                |  |

| C106483 DUTESTCD |                        |   |  |                                       |  |
|------------------|------------------------|---|--|---------------------------------------|--|
| NCI Code         | CDISC Submission Value | CDISC Synonym   | CDISC Definition   | NCI Preferred Term                    |  |
| C112418          | SIGW                   | Signal Width  | pulse per unit of time.<br>A measurement of the range of values seen in the time interval between the beginning and end of the pulse wave.                                       | Signal Width                          |  |
| C111314          | SLICNUM                | Slice Number  | The numeric identifier used to identify an image slice. (NCI)  | Slice Number                          |  |
| C156496          | SPECTWD                | Spectral Width  | The width of the wavelength interval at half maximum amplitude.  | Spectral Width                        |  |
| C156501          | SPSMTIME               | STEAM Pulse Sequence Mixing Time; Stimulated Echo Acquisition Mode Pulse Sequence Mixing Time | The time elapsed between the second and third pulses of the stimulated echo acquisition mode (STEAM) pulse sequence.   | STEAM Pulse Sequence Mixing Time      |  |
| C106534          | STHICK                 | Slice Thickness   | The dimension between two surfaces of an imaging plane. (NCI)  | Image Slice Thickness                 |  |
| C114145          | STIMPARM               | Stimulation Parameter   | The type of electrode (monopolar or bipolar) used on the subject during electrical stimulation of the body or organ.   | Electrical Stimulation Electrode Type |  |
| C158156          | TRTAMT                 | Treatment Amount  | The concentration or quantity of the treatment.  | Treatment Amount                      |  |
| C130045          | ULTRMODE               | Ultrasound Mode   | The image acquisition settings of an ultrasound-based imaging modality, based on parameters including transducer design, ultrasound frequency, and ultrasound signal processing. | Ultrasound Mode                       |  |
| C156495          | USH2OAVN               | Number of Unsuppressed Water Averages   | The number of averages of the unsuppressed water spectrum signal that are captured during imaging.   | Number of Unsuppressed Water Averages |  |
| C156497          | VOXDIMX                | X-Axis Voxel Dimension  | The linear measurement of a voxel along the X-axis.  | X-Axis Voxel Dimension                |  |
| C156498          | VOXDIMY                | Y-Axis Voxel Dimension  | The linear measurement of a voxel along the Y-axis.  | Y-Axis Voxel Dimension                |  |
| C156499          | VOXDIMZ                | Z-Axis Voxel Dimension  | The linear measurement of a voxel along the Z-axis.  | Z-Axis Voxel Dimension                |  |
| C156500          | VOXORIEN               | Voxel Angle; Voxel Orientation  | The angle of the voxel relative to the coordinate system of the scanner.   | Voxel Orientation                     |  |

| C90408   | LEAD I                 |               | A bipolar electrocardiogram limb lead which records the voltage between the negative electrode on the right thoracic limb and the positive electrode on the left thoracic limb. (NCI)   | Lead Site I        |
| C90409   | LEAD II                |               | A bipolar electrocardiogram limb lead which records the voltage between the negative electrode on the right thoracic limb and the positive electrode on the left pelvic limb. (NCI)   | Lead Site II       |
| C90410   | LEAD III               |               | A bipolar electrocardiogram limb lead which records the voltage between the negative electrode on the left thoracic limb and the positive electrode on the left pelvic limb. (NCI)  | Lead Site III      |
| C90411   | LEAD rV2               |               | A unipolar precordial lead placed at the second intercostal space to the left of the sternum. (NCI)   | Lead Site rV2      |
| C90412   | LEAD V1                | Lead C1       | A unipolar electrocardiogram lead site; the electrode is placed at the fourth intercostal space on the  | Lead Site V1       |

## C90013 EGLEAD

| NCI Code | CDISC Submission Value | CDISC Synonym | CDISC Definition   | NCI Preferred Term |
|----------|------------------------|---------------|--|--------------------|
| C90413   | LEAD V10               |               | anterior chest wall (between ribs 4 and 5) to the right of the sternal border. In small animals, it is placed at the right fifth intercostal space near the sternum. (NCI)   | Lead Site V10      |
| C90414   | LEAD V2                | Lead C2       | A unipolar chest lead at which the electrode is placed over the dorsal spinous process of 7th thoracic vertebra. (NCI)   | Lead Site V2       |
| C90415   | LEAD V3                | Lead C3       | A unipolar electrocardiogram lead site; the electrode is placed on the anterior chest wall at the fourth intercostal space (between ribs 4 and 5) to the left of the sternal border. In small animals it corresponds to V2-V3 where it is placed at the 6th left intercostal space near the sternum. In large animals it is placed over the 6th rib at the level of the costochondral junction on the left side of the thorax.   | Lead Site V3       |
| C90416   | LEAD V4                | Lead C4       | A unipolar electrocardiogram lead site; the electrode is placed on the anterior chest wall midway between leads V2 and V4. In large and small animals, it is placed over the dorsal spinous process of the 7th thoracic vertebra. (NCI)  | Lead Site V4       |
| C90417   | LEAD V5                | Lead C5       | A unipolar electrocardiogram lead site; the electrode is placed at the fifth intercostal space on the anterior chest wall (between ribs 5 and 6) at the left midclavicular line. In small animals it corresponds to V4-V6 where it is placed at the 6th left intercostal space near the costochondral junction. In large animals it is placed over the 6th rib at the level of a horizontal line drawn through the scapulohumeral articulation on the left side of the thorax. (NCI) | Lead Site V5       |
| C90418   | LEAD V6                | Lead C6       | A unipolar electrocardiogram lead site; the electrode is placed on the anterior chest wall level with lead V4 at the left anterior axillary line. In large animals it is placed on the sixth ICS on the right side of the thorax along a line parallel to the level of the point of the shoulder corresponding to the electrical center of the heart (central terminal). (NCI)   | Lead Site V6       |
| C135392  | LEAD VENTRAL           |               | A unipolar electrocardiogram lead site at which the electrode is placed on the anterior chest wall level with lead V5 at the left midaxillary line .   | Lead Site Ventral  |
|          |                        |               | A bipolar electrocardiogram limb lead which records the voltage with the positive electrode on the hindquarters proximal to the sacrum and the negative electrode near the apex of the heart (located in the ICS of left   |                    |

| C114149         | AC NOISE  | AC Noise  | An electrocardiographic recording showing power line interference with the electrocardiographic signal. The artifact amplitude modulation has the same frequency as the AC power system present (usually 50 Hz or 60 Hz).                   | Alternating Current Noise by ECG Finding                           |  |
| C62266          | ACCELERATED IDIOVENTRICULAR RHYTHM                  | Accelerated idioventricular rhythm                                  | An electrocardiographic finding of idioventricular rhythm with a rate greater than 50 beats per minute.   | Accelerated Idioventricular Rhythm by ECG Finding                  |  |
| C71065          | ACUTE ANTERIOR WALL MYOCARDIAL INFARCTION           | Acute Anterior MI;Acute Anterior Wall Myocardial Infarction         | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V3 and V4, which is suggestive of acute myocardial infarction of the anterior wall of the left ventricle.                                     | Acute Anterior Myocardial Infarction by ECG Finding                |  |
| C102591         | ACUTE ANTEROLATERAL WALL MYOCARDIAL INFARCTION      | Acute Anterolateral Wall Myocardial Infarction                      | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V3 through V6, which is suggestive of acute myocardial infarction of the anterolateral wall of the left ventricle.                            | Acute Anterolateral Myocardial Infarction by ECG Finding           |  |
| C102592         | ACUTE ANTEROSEPTAL WALL MYOCARDIAL INFARCTION       | Acute anteroseptal MI;Acute Anteroseptal Wall Myocardial Infarction | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V1 through V4, which is suggestive of acute myocardial infarction of the anteroseptal wall of the left ventricle.                             | Acute Anteroseptal Myocardial Infarction by ECG Finding            |  |
| C106496         | ACUTE EXTENSIVE ANTERIOR WALL MYOCARDIAL INFARCTION |   | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V1 to V6, I and aVL, which is suggestive of acute myocardial infarction involving the anterior and anterolateral walls of the left ventricle. | Acute Extensive Anterior Wall Myocardial Infarction by ECG Finding |  |
| C102593         | ACUTE HIGH LATERAL WALL MYOCARDIAL INFARCTION       | Acute High Lateral Wall Myocardial Infarction                       | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads I and aVL, which is suggestive of acute myocardial infarction of the high lateral wall of the left ventricle.                                 | Acute High Lateral Myocardial Infarction by ECG Finding            |  |
| C71066          | ACUTE INFERIOR WALL MYOCARDIAL INFARCTION           | Acute Inferior MI;Acute Inferior Wall Myocardial Infarction         | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads III, aVF and often II, which is suggestive of acute myocardial infarction of the inferior wall of the left ventricle.                         | Acute Inferior Myocardial Infarction by ECG Finding                |  |

| C71150 EGSTRESC |  |   |   |  |  |
|-----------------|--|---|---|--|--|
| NCI Code        | CDISC Submission Value                             | CDISC Synonym   | CDISC Definition  | NCI Preferred Term   |  |
| C71067          | ACUTE LATERAL WALL MYOCARDIAL INFARCTION           | Acute Lateral MI;Acute Lateral Wall Myocardial Infarction                     | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V5, V6, I and aVL, which is suggestive of acute myocardial infarction of the lateral wall of the left ventricle.  | Acute Lateral Myocardial Infarction by ECG Finding           |  |
| C101596         | ACUTE MYOCARDIAL INFARCTION                        | Acute Myocardial Infarction   | An electrocardiographic finding showing a current of injury with ST elevation. No specification is provided for localization.   | Acute Myocardial Infarction by ECG Finding                   |  |
| C71068          | ACUTE POSTERIOR WALL MYOCARDIAL INFARCTION         | Acute Posterior MI;Acute Posterior Wall Myocardial Infarction                 | An electrocardiographic finding in leads V1 or V2 of an initial R wave duration greater than or equal to 40 ms, R wave greater than S wave, upright T wave, with accompanying ST elevation, which is suggestive of acute myocardial infarction of the posterior wall of the left ventricle. Evidence of inferior or lateral myocardial infarction is usually also present.  | Acute Posterior Myocardial Infarction by ECG Finding         |  |
| C102594         | ACUTE RIGHT VENTRICULAR WALL MYOCARDIAL INFARCTION | Acute Right ventricular MI;Acute Right Ventricular Wall Myocardial Infarction | An electrocardiographic finding in leads V1 or V2 of an initial R wave duration greater than or equal to 40 ms, R wave greater than S wave, upright T wave, with accompanying ST elevation, which is suggestive of acute myocardial infarction of the ventricular wall of the left ventricle. Evidence of inferior or lateral myocardial infarction is usually also present. Additional criteria include ST elevation > 100 microvolts in the right precordial leads V4R through V6R. | Acute Right Ventricular Myocardial Infarction by ECG Finding |  |
| C102595         | ACUTE SEPTAL WALL MYOCARDIAL INFARCTION            | Acute Septal Wall Myocardial Infarction                                       | An electrocardiographic finding of pathologic Q waves with accompanying ST elevation in leads V1, V2 and often V3, which is suggestive of acute myocardial infarction of the intraventricular septum.   | Acute Septal Myocardial Infarction by ECG Finding            |  |
| C102642         | ADVANCED/HIGH GRADE AV BLOCK                       | Advanced/High Grade AV Block  | An electrocardiographic finding of intermittent failure of atrial electrical impulse conduction to the ventricles, characterized by two or more consecutive non-conducted P waves.  | High Grade Atrioventricular Block by ECG Finding             |  |
| C114159         | ALL PRECORDIAL ELECTRODES DISCONNECTED             |   | An electrocardiographic recording in which all precordial electrodes are disconnected resulting in missing waveforms (flat line) of all leads V1 - V6.  | All Precordial Electrodes Are Disconnected by ECG Finding    |  |

| C71150 EGSTRESC |  |   |   |  |
|-----------------|--|---|---|--|
| NCI Code        | CDISC Submission Value                   | CDISC Synonym   | CDISC Definition  | NCI Preferred Term                                 |
| C71069          | ANTERIOR WALL MYOCARDIAL INFARCTION      | Anterior MI;Anterior Wall Myocardial Infarction         | An electrocardiographic finding of pathologic Q waves in leads V3 and V4, which is suggestive of myocardial infarction of the anterior wall of the left ventricle.  | Anterior Myocardial Infarction by ECG Finding      |
| C35303          | ANTEROLATERAL WALL MYOCARDIAL INFARCTION | Anterolateral Wall Myocardial Infarction                | An electrocardiographic finding of pathologic Q waves in leads V3 through V6, which is suggestive of myocardial infarction of the anterolateral wall of the left ventricle.   | Anterolateral Myocardial Infarction by ECG Finding |
| C35304          | ANTEROSEPTAL WALL MYOCARDIAL INFARCTION  | Anteroseptal MI;Anteroseptal Wall Myocardial Infarction | An electrocardiographic finding of pathologic Q waves in leads V1 through V4, which is suggestive of myocardial infarction of the anteroseptal wall of the left ventricle.  | Anteroseptal Myocardial Infarction by ECG Finding  |
| C114162         | ARTIFACT                                 |   | An electrocardiographic recording in which one or more leads display extraneous signals which do not represent cardiac electrical activity.   | Artifact Lead Signal by ECG Finding                |
| C116130         | ASYSTOLE                                 |   | An electrocardiographic finding showing no cardiac electrical activity on the ECG for the entire duration of the recording.   | Asystole by ECG Finding                            |
| C102596         | ATRIAL BIGEMINY                          |   | An electrocardiographic finding of a sinus beat followed by a premature atrial complex for three or more consecutive cycles; a regularly irregular rhythm of normal and abnormal P waves in a 1-1 ratio.  | Atrial Bigeminy by ECG Finding                     |
| C102597         | ATRIAL COUPLETS                          | Atrial Couplets   | An electrocardiographic finding in which two premature atrial complexes occur sequentially; there may be one or more occurrences during an electrocardiographic recording.  | Atrial Couplet by ECG Finding                      |
| C71039          | ATRIAL ENLARGEMENT                       | Atrial Enlargement                                      | An electrocardiographic finding which comprises left, right or bilateral atrial enlargement. This is may be characterized by prolonged P wave duration, increased P wave amplitude, or multi-component P waves.   | Atrial Enlargement by ECG Finding                  |
| C111092         | ATRIAL FIBRILLATION                      | Atrial fibrillation                                     | An electrocardiographic finding of a supraventricular arrhythmia characterized by the replacement of consistent P waves by rapid oscillations or fibrillatory waves that vary in size, shape and timing and are accompanied by an irregularly irregular | Atrial Fibrillation by ECG Finding                 |

| C71150 EGSTRESC |                                  |  |  |   |
|-----------------|----------------------------------|--|--|---|
| NCI Code        | CDISC Submission Value           | CDISC Synonym  | CDISC Definition   | NCI Preferred Term  |
| C111094         | ATRIAL FLUTTER                   | Atrial flutter   | ventricular response. An electrocardiographic finding of an organized, regular atrial rhythm with atrial rate of 240-340 beats per minute. Multiple P waves typically appear in the inferior leads in a saw tooth like pattern between the QRS complexes.                      | Atrial Flutter by ECG Finding                             |
| C119249         | ATRIAL TACHYCARDIA WITH AV BLOCK |  | An electrocardiographic finding of an atrial tachycardia which does not display 1:1 AV conduction.   | Atrial Tachycardia With AV Block by ECG Finding           |
| C111105         | ATRIAL TACHYCARDIA               | Atrial tachycardia   | An electrocardiographic finding of an organized, regular atrial rhythm with atrial rate between 101 and 240 beats per minute. The P wave morphology must be distinct from the sinus P wave morphology.   | Atrial Tachycardia by ECG Finding                         |
| C102598         | ATRIAL TRIGEMINY                 | Atrial Trigeminy   | An electrocardiographic finding of two sinus beats followed by a premature atrial complex for 3 or more consecutive cycles; a regularly irregular rhythm of normal and abnormal P waves in a 2-1 ratio.  | Atrial Trigeminy by ECG Finding                           |
| C71045          | ATRIOVENTRICULAR DISSOCIATION    | Atrioventricular dissociation;AV Dissociation  | An electrocardiographic finding in which the electrical activity of the atria and ventricles are independent of one another.   | Atrioventricular Dissociation by ECG Finding              |
| C111089         | AV MOBITZ I                      | AV Mobitz I;Mobitz I Second Degree AV Block;Second degree AV block- Mobitz type I;Second-degree AV block, Mobitz type I (Wenckebach);Type 1 2nd degree AV Block;Wenckebach | An electrocardiographic finding of intermittent failure of atrial electrical impulse conduction to the ventricles, characterized by a progressively lengthening PR interval prior to the block of an atrial impulse.   | AV Block Second Degree Mobitz Type I by ECG Finding       |
| C111090         | AV MOBITZ II                     | Mobitz II AV Block;Mobitz II Second Degree AV Block;Type 2 2nd degree AV Block   | An electrocardiographic finding of intermittent failure of atrial electrical impulse conduction to the ventricles, characterized by a relatively constant PR interval prior to the block of an atrial impulse.   | AV Block Second Degree Mobitz Type II by ECG Finding      |
| C35058          | AV NODE RE-ENTRY                 | AV Node Reentrant Supraventricular Tachycardia   | An electrocardiographic finding of a regular supraventricular tachycardia due to reentry within the AV node. It is characterized by P waves which typically occurs nearly simultaneously with the QRS complex, resulting in a P wave which is obscured by the QRS, merged with | Atrioventricular Nodal Reentry Tachycardia by ECG Finding |

| C71150<br>NCI<br>Code | EGSTRESC<br>CDISC Submission Value | CDISC Synonym                             | CDISC Definition  | NCI Preferred Term                                    |
|-----------------------|------------------------------------|---|---|---|
| C62261                | AV RE-ENTRANT TACHYCARDIA          | AV Reentrant Supraventricular Tachycardia | the QRS or which may follow the QRS. An electrocardiographic finding of a regular supraventricular tachycardia which utilizes an atrioventricular bypass tract as its retrograde limb (orthodromic tachycardia) or as its antegrade limb (antidromic tachycardia). QRS complexes during sinus rhythm may show preexcitation. During orthodromic tachycardia the preexcitation is not present and a retrograde P wave may appear after the QRS complex. During antidromic tachycardia the QRS complex is preexcited. | Atrioventricular Reentrant Tachycardia by ECG Finding |
| C114147               | BASELINE WANDER                    |   | An electrocardiographic recording in which the isoelectric line in one or more leads is vertically displaced resulting in low frequency upward and downward movements of the signal with varying amplitudes.  | Baseline Wander by ECG Finding                        |
| C71046                | BIFASCICULAR BLOCK                 | Bifascicular block                        | An electrocardiographic finding comprising right bundle branch block and left anterior fascicular block, or right bundle branch block and left posterior fascicular block. Defects occurring in two of the three divisions of the conduction system of the heart are considered bifascicular blocks. Technically left bundle branch block may be considered a bifascicular block. (NCI)   | Bifascicular Block by ECG Finding                     |
| C106502               | BIVENTRICULAR HYPERTROPHY          |   | An electrocardiographic finding suggestive of enlargement or thickening of both ventricles, with a combination of findings which are related to LVH and RVH, such as voltage criteria for LVH in the presence of marked right axis deviation.   | Biventricular Hypertrophy by ECG Finding              |
| C92228                | BORDERLINE QTcB                    | Borderline QTcB                           | An electrocardiographic finding in which the QT interval corrected for heart rate using Bazett's formula is slightly prolonged. Thresholds for different age, gender, and patient populations exist.  | Borderline QTcB                                       |
| C92229                | BORDERLINE QTcF                    | Borderline QTcF                           | An electrocardiographic finding in which the QT interval corrected for heart rate using   | Borderline QTcF                                       |

| C71150<br>NCI<br>Code | EGSTRESC<br>CDISC Submission Value | CDISC Synonym | CDISC Definition   | NCI Preferred Term                      |
|-----------------------|------------------------------------|---------------|--|---|
| C111120               | BRADYCARDIA                        | Bradycardia   | Fridericia's formula is slightly prolonged. Thresholds for different age, gender, and patient populations exist. An electrocardiographic finding of abnormally slow heart rate. Thresholds for different age, gender, and patient populations exist.   | Bradycardia by ECG Finding              |
| C106503               | BRUGADA SYNDROME PATTERN           |               | An electrocardiographic finding of complete or incomplete right bundle branch block accompanied by ST elevation in leads V1-V3. This may be noted at rest or can be provoked by medication challenge.  | Brugada Syndrome Pattern by ECG Finding |
| C116138               | CV ENDPOINTS ISCHEMIC ECG CHANGES  |               | An electrocardiographic finding, in the absence of left ventricular hypertrophy (LVH) and left bundle branch block pattern on ECG, of either a) new (or presumed new) ST elevation at the J point in two contiguous leads with the following cut-points: greater than or equal to 0.1 mV in all leads other than leads V2-V3 where the following cut points apply: greater than or equal to 0.2 mV in men greater than or equal to 40 years; greater than or equal to 0.25 mV in men less than 40 years, or greater than or equal to 0.15 mV in women; or b) new (or presumed new) horizontal or down-sloping ST depression greater than or equal to 0.05 mV in two contiguous leads and/or T inversion greater than or equal to 0.1 mV in two contiguous leads with prominent R wave or R/S ratio greater than 1. (Thygesen K, Alpert JS, Jaffe AS, Simoons ML, et al.; Joint ESC/ACCF/AHA/WHF Task Force for Universal Definition of Myocardial Infarction. Third universal definition of myocardial infarction. J Am Coll Cardiol. 2012 Oct 16;60(16):1581-98). | ACC/AHA Ischemic ECG Changes            |
| C62258                | DELTA WAVE                         | Delta wave    | An electrocardiographic finding of initial slurring (delta wave) of the QRS complex due to the presence of an accessory pathway. This characteristic ECG pattern is typically seen in Wolff-   | Delta Wave by ECG Finding               |

| C71150<br>NCI<br>Code | EGSTRESC<br>CDISC Submission Value  | CDISC Synonym                                    | CDISC Definition   | NCI Preferred Term  |
|-----------------------|---|--|--|---|
| C102623               | DEXTROCARDIA  | Dextrocardia                                     | Parkinson-White syndrome.<br>An electrocardiographic finding suggestive of dextrocardia with situs inversus, characterized by reversal of normal anterior R wave progression and the appearance of reversal of the right and left arm electrodes.                        | Dextrocardia by ECG Finding   |
| C102628               | EARLY R WAVE TRANSITION   | Early R Wave Progression;Early R Wave Transition | An electrocardiographic finding where the amplitude of the R wave becomes greater than the amplitude of the S wave in the QRS complex at an unusually early point in the precordial leads, usually in leads V1 or V2.  | Early R Wave Transition by ECG Finding  |
| C102629               | EARLY REPOLARIZATION  | Early Repolarization                             | An electrocardiographic finding of J point and ST segment elevation in the absence of other signs of acute ischemia or pericarditis.   | Early Repolarization  |
| C114175               | ECG ACQUIRED WITH PRECORDIAL ELECTRODES PLACED ON RIGHT CHEST                     |  | An electrocardiographic recording in which the precordial electrodes have been placed over the right chest and record a right sided ECG.   | ECG Acquired with Precordial Electrodes Placed on the Right Chest                 |
| C114181               | ECG EVALUATION NOT PERFORMED DUE TO CORRUPTED DIGITAL ECG FILE                    |  | A digital electrocardiographic recording which is corrupted (i.e. ECG signal cannot be restored) such that measurements and/or interpretation cannot be performed.   | ECG Evaluation Not Performed Due to Corrupted Digital ECG File                    |
| C114180               | ECG EVALUATION NOT PERFORMED DUE TO POOR QUALITY OF PRINTED ECG                   |  | A printed electrocardiographic recording with poor printout quality (e.g. a faded paper ECG tracing or ECG with inconsistent printing speed) such that measurements and/or interpretation cannot be performed.   | ECG Evaluation Not Performed Due to Poor Quality of Printed ECG                   |
| C114178               | ECG EVALUATION NOT PERFORMED DUE TO UNKNOWN ECG AMPLITUDE GAIN OR RECORDING SPEED |  | An electrocardiographic recording in which measurements and/or interpretation are not performed because the ECG amplitude gain and/or recording speed are not known.   | ECG Evaluation Not Performed Due to Unknown ECG Amplitude Gain or Recording Speed |
| C62245                | ECTOPIC ATRIAL RHYTHM   | Ectopic Supraventricular Rhythm                  | An electrocardiographic finding of a regular atrial rhythm with atrial rate of less than 101 beats per minute which does not originate in the sinus node, and which is characterized by P waves whose morphology differs from the P wave morphology during sinus rhythm. | Ectopic Atrial Rhythm by ECG Finding  |
| C71042                | ECTOPIC VENTRICULAR RHYTHM  | Ectopic ventricular rhythm                       | An electrocardiographic finding of three or  | Ectopic Ventricular Rhythm by ECG Finding   |

| C71150 EGSTRESC |  |   |  |  |
|-----------------|--|---|--|--|
| NCI Code        | CDISC Submission Value                                     | CDISC Synonym                           | CDISC Definition   | NCI Preferred Term   |
| C71035          | ELECTRICAL ALTERNANS                                       | Electrical alternans                    | more consecutive complexes of ventricular origin. The QRS complexes are wide and have an abnormal morphology.<br>An electrocardiographic finding in which there is an alternating pattern of any of the waveform components. (NCI)   | Electrical Alternans by ECG Finding                          |
| C106520         | EXTENSIVE ANTERIOR WALL MYOCARDIAL INFARCTION              |   | An electrocardiographic finding of pathologic Q waves in leads V1 to V6, I and aVL, which is suggestive of myocardial infarction involving the anterior and anterolateral walls of the left ventricle.   | Extensive Anterior Wall Myocardial Infarction by ECG Finding |
| C102639         | FUSION COMPLEX   | Fusion Beat;Fusion Complexes            | An electrocardiographic finding that occurs when electrical activation of the atria or ventricles occurs from two separate sites. This results in a P wave or QRS complex that displays merged characteristics of beats originating from the two different sites; there may be one or more occurrences during an electrocardiographic recording. | Fusion Complex   |
| C102643         | HIGH LATERAL WALL MYOCARDIAL INFARCTION                    | High Lateral Wall Myocardial Infarction | An electrocardiographic finding of pathologic Q waves in leads I and aVL, which is suggestive of myocardial infarction of the high lateral wall of the left ventricle.   | High Lateral Myocardial Infarction by ECG Finding            |
| C50599          | IDIOVENTRICULAR RHYTHM                                     | Idioventricular Rhythm                  | An electrocardiographic finding of three or more consecutive complexes of ventricular origin with a rate less than a certain threshold (100 or 120 beats per minute are commonly used). The QRS complexes are wide and have an abnormal morphology.  | Idioventricular Rhythm                                       |
| C114167         | INCOMPLETE ECG   |   | An electrocardiographic recording which is limited in duration or which does not display all of the expected leads.  | Incomplete ECG   |
| C71047          | INCOMPLETE LEFT BUNDLE BRANCH BLOCK                        | Incomplete left bundle branch block     | An electrocardiographic finding of a wide QRS complex with evidence of delayed conduction to the left ventricle, manifest as a widened initial portion of the QRS complex in leads V5, V6, I and aVL and with QRS duration less than 120 ms.   | Incomplete Left Bundle Branch Block by ECG Finding           |
| C114179         | INCOMPLETE MEASUREMENTS DUE TO TRUNCATION OF QRS COMPLEXES |   | An electrocardiographic recording in which   | Incomplete ECG Measurements Due to Truncation of QRS         |

| C71150   | EGSTRESC  |  |  |  |  |
|----------|---|--|--|--|--|
| NCI Code | CDISC Submission Value                                  | CDISC Synonym  | CDISC Definition   | NCI Preferred Term   |  |
|          |   |  | measurements (particularly of QRS amplitudes) and/or interpretations are not performed because QRS complexes have been truncated.  | Complexes  |  |
| C71048   | INCOMPLETE RIGHT BUNDLE BRANCH BLOCK                    | Incomplete right bundle branch block; Incomplete right bundle-branch block | An electrocardiographic finding of a wide QRS complex with evidence of delayed conduction to the right ventricle, manifest by a widened initial portion of the QRS in V1 and V2, a widened S wave in V5, V6, I and aVL, and with QRS duration less than 120 ms.                                      | Incomplete Right Bundle Branch Block by ECG Finding          |  |
| C114169  | INCOMPLETELY DIGITIZED ECG LEAD(S)                      |  | A digital electrocardiographic recording which was digitized from paper ECG tracings and which does not contain all leads present on the original paper printout.  | Incompletely Digitized ECG Leads                             |  |
| C114168  | INCORRECTLY SCALED ECG                                  |  | An electrocardiographic recording in which the ECG signal is not displayed at the indicated recording speed and/or amplitude resolution.   | Incorrectly Scaled ECG                                       |  |
| C102701  | INDETERMINATE QRS AXIS                                  | Indeterminate Axis; Indeterminate QRS Axis; QRS Axis Indeterminate         | An electrocardiographic finding in which the frontal plane QRS axis cannot be calculated.  | QRS Axis Indeterminate                                       |  |
| C35398   | INFERIOR WALL MYOCARDIAL INFARCTION                     | Inferior MI; Inferior Wall Myocardial Infarction                           | An electrocardiographic finding of pathologic Q waves in leads III, aVF and often II, which is suggestive of myocardial infarction of the inferior wall of the left ventricle.   | Inferior Myocardial Infarction by ECG Finding                |  |
| C114177  | INSUFFICIENT NUMBER OF BEATS TO COMPLETELY EVALUATE ECG |  | An electrocardiographic recording in which fewer than the required number of cardiac complexes are available for measurement and/or interpretation due to a shorter than planned recording or due to cardiac complexes which are present but are not suitable for measurement and/or interpretation. | Insufficient Number of Beats for Complete ECG Evaluation     |  |
| C71073   | INTRAATRIAL CONDUCTION DELAY                            | Intraatrial Conduction Delay   | An electrocardiographic finding of a delay in impulse propagation through the atria. This is characterized by broad P waves which are often biphasic in V1.  | Intra-Atrial Conduction Delay by ECG Finding                 |  |
| C62271   | INTRAVENTRICULAR CONDUCTION DELAY, NONSPECIFIC          | Intraventricular Conduction Defect; Intraventricular conduction delay      | An electrocardiographic finding of a widened QRS duration typically greater than 110 ms which does not meet the morphologic criteria for any of the standard bundle branch or fascicular block patterns.   | Nonspecific Intraventricular Conduction Delay by ECG Finding |  |
| C114171  | INVALID ECG WAVEFORMS                                   |  | An electrocardiographic  | Invalid ECG Waveforms  |  |

| C71150 EGSTRESC |                              |   |  |   |
|-----------------|------------------------------|---|--|---|
| NCI Code        | CDISC Submission Value       | CDISC Synonym   | CDISC Definition   | NCI Preferred Term                          |
| C62248          | ISORHYTHMIC DISSOCIATION     | Isorhythmic dissociation                              | recording for which the displayed leads do not represent the individual's true ECG lead information.<br>An electrocardiographic finding of a type of atrioventricular dissociation characterized by the atria (P waves) and ventricles (QRS complexes) beating at similar rates, although independently. | Isorhythmic Atrioventricular Dissociation   |
| C71030          | J POINT ELEVATION            | J point elevation                                     | An electrocardiographic finding of a significant elevation above the baseline of the J point.  | J Point Elevation                           |
| C71074          | JUNCTIONAL BRADYCARDIA       | Junctional bradycardia                                | An electrocardiographic finding of a junctional rhythm with a heart rate which is abnormally low.  | Junctional Bradycardia by ECG Finding       |
| C116129         | JUNCTIONAL ESCAPE COMPLEXES  | Junctional Escape Beat; Junctional Escape Complex     | An electrocardiographic finding of an escape beat following a pause which originates in the AV junction. This is manifest as a QRS complex of supraventricular origin not preceded by a P wave; there may be one or more occurrences during an electrocardiographic recording.                           | Junctional Escape Complexes by ECG Finding  |
| C135393         | JUNCTIONAL ESCAPE RHYTHM     |   | An electrocardiographic finding of a junctional rhythm that arises as a physiologic response to extreme slowing or arrest of sinus node activity. In this setting, a faster junctional rhythm may be a normal response to a very slow or absent sinus rate.  | Junctional Escape Rhythm by ECG Finding     |
| C102652         | JUNCTIONAL PREMATURE COMPLEX | Junctional Extra Beat; Junctional Premature Complexes | An electrocardiographic finding of an ectopic impulse originating in the AV junction presenting as a QRS complex of supraventricular origin which is not preceded by a P wave; there may be one or more occurrences during an electrocardiographic recording.  | Junctional Premature Complex by ECG Finding |
| C71051          | JUNCTIONAL RHYTHM            | Junctional rhythm                                     | An electrocardiographic finding of a rhythm which originates in the AV junction and results in a normal heart rate. It is characterized by retrograde P waves which may be obscured by or may follow the QRS complexes. The QRS complexes may be narrow or may demonstrate aberration.                   | Junctional Rhythm by ECG Finding            |
| C35059          | JUNCTIONAL TACHYCARDIA       | Junctional tachycardia                                | An electrocardiographic finding of a junctional  | Junctional Tachycardia by ECG Finding       |

| C71150 EGSTRESC |  |   |   |   |
|-----------------|--|---|---|---|
| NCI Code        | CDISC Submission Value                   | CDISC Synonym   | CDISC Definition  | NCI Preferred Term                                      |
| C102653         | LATE R WAVE TRANSITION                   | Late R Wave Transition  | rhythm with a heart rate which is abnormally elevated.<br>An electrocardiographic finding where the amplitude of the R wave does not become greater than the amplitude of the S wave until an unusually late point in the precordial leads, usually in leads V4 to V6.                            | Late R Wave Transition by ECG Finding                   |
| C35586          | LATERAL WALL MYOCARDIAL INFARCTION       | Lateral MI;Lateral Wall Myocardial Infarction                   | An electrocardiographic finding of pathologic Q waves in leads V5, V6, I and aVL, which is suggestive of myocardial infarction of the lateral wall of the left ventricle.   | Lateral Myocardial Infarction by ECG Finding            |
| C62267          | LEFT ANTERIOR FASCICULAR BLOCK           | Left anterior fascicular block;Left Anterior Hemiblock          | An electrocardiographic finding of a slightly widened QRS duration (typically less than 120 ms) with leftward frontal plane QRS axis and typically small Q waves in leads I and aVL.  | Left Anterior Fascicular Block by ECG Finding           |
| C71040          | LEFT ATRIAL ABNORMALITY                  | Left Atrial Enlargement;P-mitrale                               | An electrocardiographic finding suggesting underlying hypertrophy or dilatation of the left atrium.<br>Electrocardiographic criteria used for the diagnosis of left atrial abnormality may include a bifid p wave, a biphasic p wave and/or a p wave duration of greater than 0.12 seconds. (NCI) | P-mitrale by ECG Finding                                |
| C62269          | LEFT BUNDLE BRANCH BLOCK                 | Complete LBBB;Left bundle branch block;Left bundle-branch block | An electrocardiographic finding of a wide QRS complex with evidence of delayed conduction to the left ventricle, manifest as a widened initial portion of the QRS complex in leads V5, V6, I and aVL and with QRS duration greater than or equal to 120 ms.                                       | Left Bundle Branch Block by ECG Finding                 |
| C62268          | LEFT POSTERIOR FASCICULAR BLOCK          | Left posterior fascicular block;Left Posterior Hemiblock        | An electrocardiographic finding of an S1Q3 pattern and QRS axis greater than or equal to 120 degrees. It is usually seen in association with other abnormalities (e.g. RBBB or RVH).  | Left Posterior Fascicular Block by ECG Finding          |
| C92231          | LEFT VENTRICULAR CONDUCTION DELAY        | Left Ventricular Conduction Delay                               | An electrocardiographic finding in which there is evidence that electrical transmission through the left ventricle is impaired.   | Left Ventricular Conduction Delay by ECG Finding        |
| C102655         | LEFT VENTRICULAR HYPERTROPHY WITH STRAIN | Left Ventricular Hypertrophy With Strain                        | An electrocardiographic finding suggestive of a hypertrophied left ventricle, characterized by large QRS amplitudes, ST depression and T  | Left Ventricular Hypertrophy with Strain by ECG Finding |

| C71150 EGSTRESC |                                |                               |  |   |
|-----------------|--------------------------------|-------------------------------|--|---|
| NCI Code        | CDISC Submission Value         | CDISC Synonym                 | CDISC Definition   | NCI Preferred Term                            |
| C71076          | LEFT VENTRICULAR HYPERTROPHY   | Left Ventricular Hypertrophy  | wave inversion.<br>An electrocardiographic finding suggestive of a hypertrophied left ventricle, characterized by large QRS amplitudes and secondary findings of left atrial enlargement, left axis deviation, or typical pattern of ST depression and T wave inversion.   | Left Ventricular Hypertrophy by ECG Finding   |
| C114151         | LIMB ELECTRODE(S) DISCONNECTED |                               | An electrocardiographic recording in which one or more of the limb electrodes are disconnected resulting in missing waveforms (often flat lines) of the respective leads.  | Disconnected Limb Electrodes by ECG Finding   |
| C114150         | LIMB ELECTRODES INTERCHANGED   | Limb Lead Reversal            | An electrocardiographic recording in which two or more of the limb electrodes are switched resulting in improper representation of the affected leads.   | Interchanged Limb Electrodes by ECG Finding   |
| C114166         | LOW AMPLITUDE SIGNAL           | Low Amplitude QRS Complex     | An electrocardiographic recording showing smaller than usual QRS complexes in one or more leads. This may represent a technical issue with the ECG acquisition or characteristics of the individual.   | Low Amplitude QRS Complex by ECG Finding      |
| C71078          | LOW QRS VOLTAGE                | Low QRS voltage               | An electrocardiographic finding of a QRS amplitude less than or equal to 0.5 mV in the limb leads or QRS amplitude less than or equal to 1 mV in the precordial leads.   | Low QRS Voltage by ECG Finding                |
| C116133         | LOW VOLTAGE - LIMB LEADS ONLY  |                               | An electrocardiographic finding of small QRS amplitudes (less than 500 microvolts) in all limb leads.  | Low Voltage in Limb Leads Only by ECG Finding |
| C71050          | MULTIFOCAL ATRIAL TACHYCARDIA  | Multifocal atrial tachycardia | An electrocardiographic finding of a supraventricular arrhythmia characterized by 3 or more distinct P wave morphologies with an isoelectric baseline, variable PR intervals and no predominant atrial rhythm. The ventricular rate is typically 100-150 beats per minute. | Multifocal Atrial Tachycardia by ECG Finding  |
| C114148         | MUSCLE TREMOR                  |                               | An electrocardiographic recording with intermittent mid to high frequency artifact in one or more leads due to muscular tremor or movement rather than cardiac activity.   | Muscle Tremor Artifact                        |
| C101589         | MYOCARDIAL INFARCTION          | Myocardial Infarction         | An electrocardiographic finding of pathologic Q waves, which is suggestive of myocardial infarction of one or more   | Myocardial Infarction by ECG Finding          |

| C71150 EGSTRESC |   |   |  |   |
|-----------------|---|---|--|---|
| NCI Code        | CDISC Submission Value                            | CDISC Synonym   | CDISC Definition   | NCI Preferred Term  |
|                 |   |   | regions of the heart. No specification is provided for localization.   |   |
| C102732         | NEW ANTERIOR WALL MYOCARDIAL INFARCTION           | New Anterior MI;New Anterior Wall Myocardial Infarction | An electrocardiographic finding of pathologic Q waves in leads V3 and V4, which is suggestive of myocardial infarction of the anterior wall of the left ventricle and which is new compared to prior ECGs.                                     | New Anterior Myocardial Infarction by ECG Finding           |
| C102733         | NEW ANTEROLATERAL WALL MYOCARDIAL INFARCTION      | New Anterolateral Wall Myocardial Infarction            | An electrocardiographic finding of pathologic Q waves in leads V3 through V6, which is suggestive of myocardial infarction of the anterolateral wall of the left ventricle and which is new compared to prior ECGs.                            | New Anterolateral Myocardial Infarction by ECG Finding      |
| C102734         | NEW ANTEROSEPTAL WALL MYOCARDIAL INFARCTION       | New Anteroseptal Wall Myocardial Infarction             | An electrocardiographic finding of pathologic Q waves in leads V1 through V4, which is suggestive of myocardial infarction of the anteroseptal wall of the left ventricle and which is new compared to prior ECGs.                             | New Anteroseptal Myocardial Infarction by ECG Finding       |
| C102735         | NEW EXTENSIVE ANTERIOR WALL MYOCARDIAL INFARCTION | New Extensive Anterior Wall Myocardial Infarction       | An electrocardiographic finding of pathologic Q waves in leads V1 to V6, I and aVL, which is suggestive of myocardial infarction involving the anterior and anterolateral walls of the left ventricle and which is new compared to prior ECGs. | New Extensive Anterior Myocardial Infarction by ECG Finding |
| C102736         | NEW HIGH LATERAL WALL MYOCARDIAL INFARCTION       | New High Lateral Wall Myocardial Infarction             | An electrocardiographic finding of pathologic Q waves in leads I and aVL, which is suggestive of myocardial infarction of the high lateral wall of the left ventricle and which is new compared to prior ECGs.                                 | New High Lateral Myocardial Infarction by ECG Finding       |
| C102737         | NEW INFERIOR WALL MYOCARDIAL INFARCTION           | New Inferior Wall Myocardial Infarction                 | An electrocardiographic finding of pathologic Q waves in leads III, aVF and often II, which is suggestive of myocardial infarction of the inferior wall of the left ventricle and which is new compared to prior ECGs.                         | New Inferior Myocardial Infarction by ECG Finding           |
| C102738         | NEW LATERAL WALL MYOCARDIAL INFARCTION            | New Lateral Wall Myocardial Infarction                  | An electrocardiographic finding of pathologic Q waves in leads V5, V6, I and aVL, which is suggestive of myocardial infarction of the lateral wall of the left ventricle and which is new compared to prior ECGs.                              | New Lateral Myocardial Infarction by ECG Finding            |
| C102731         | NEW MYOCARDIAL INFARCTION                         | New Myocardial Infarction                               | An electrocardiographic  | New Myocardial Infarction by ECG Finding                    |

| C71150 EGSTRESC |  |  |  |   |
|-----------------|--|--|--|---|

| C106548         | NEW POSTERIOR WALL MYOCARDIAL INFARCTION   |  | finding of pathologic Q waves, which is suggestive of myocardial infarction of one or more regions of the heart and which is new compared to prior ECGs. No specification is provided for localization.<br>An electrocardiographic finding in leads V1 or V2 of an initial R wave duration greater than or equal to 40 ms, R wave greater than S wave, and upright T wave, which is suggestive of myocardial infarction of the posterior wall of the left ventricle, and which is new compared to prior ECGs. Evidence of inferior or lateral myocardial infarction is usually also present. | New Posterior Wall Myocardial Infarction by ECG Finding |
| C102739         | NEW SEPTAL WALL MYOCARDIAL INFARCTION      | New Septal Wall Myocardial Infarction                                      | An electrocardiographic finding of pathologic Q waves in leads V1, V2 and often V3, which is suggestive of myocardial infarction of the intraventricular septum and which is new compared to prior ECGs.   | New Septal Myocardial Infarction by ECG Finding         |
| C114163         | NO ECG WAVEFORMS PRESENT                   |  | An electrocardiographic recording that displays flat lines (no waveforms are visible) in all leads present.  | ECG Waveforms Not Present                               |
| C71080          | NON Q WAVE MYOCARDIAL INFARCTION           | Non Q Wave Myocardial Infarction   | An electrocardiographic finding of ST and T wave abnormalities in the absence of pathologic Q waves, which is suggestive of myocardial infarction in one or more regions of the heart.   | Non Q Wave Myocardial Infarction by ECG Finding         |
| C116134         | NON-DIAGNOSTIC Q WAVES                     |  | An electrocardiographic finding of Q waves which are insufficient for the diagnosis of myocardial infarction. In such cases a myocardial infarction may be suspected, even though ECG criteria are not met.  | Non-Diagnostic Q Waves by ECG Finding                   |
| C71031          | NON-SPECIFIC ST-T CHANGES                  | Non-specific ST-T changes  | An electrocardiographic finding of changes in the ST segment and T wave that do not meet criteria for ischemia or infarction. (NCI)  | Non-Specific ST-T Changes by ECG Finding                |
| C102680         | NON-SUSTAINED ATRIAL TACHYCARDIA           | Non-Sustained Atrial Tachycardia   | An electrocardiographic finding of an atrial tachycardia which terminates in less than 30 seconds.   | Non-Sustained Atrial Tachycardia by ECG Finding         |
| C71053          | NON-SUSTAINED VENTRICULAR TACHYCARDIA      | Non-sustained ventricular tachycardia;Ventricular tachycardia, unsustained | An electrocardiographic finding of ventricular tachycardia less than 30 seconds in duration. (NCI)   | Non-Sustained Ventricular Tachycardia by ECG Finding    |
| C135394         | NONCONDUCTED P WAVE PHYSIOLOGY NOT DEFINED |  | An electrocardiographic  | Nonconducted P Wave Physiology Not Defined by           |

| C71150 EGSTRESC |  |  |   |  |
|-----------------|--|--|---|--|
| NCI Code        | CDISC Submission Value   | CDISC Synonym  | CDISC Definition  | NCI Preferred Term   |
|                 |  |  | finding of a P wave that does not conduct to the ventricle or result in ventricular activation.   | ECG Finding  |
| C102681         | NORMAL SINUS RHYTHM  | Normal Sinus Rhythm  | An electrocardiographic finding of an atrial rhythm which originates from the sinoatrial node that is considered normal for the population. There are no extra beats or conduction abnormalities.   | Normal Sinus Rhythm  |
| C102634         | NORTHWEST AXIS   | Northwest Axis;Right superior axis                                     | An electrocardiographic finding of a frontal plane QRS axis from -90 to +180 degrees.   | Extreme Right Axis Deviation   |
| C71032          | NOTCHED T WAVES  | Notched T Waves  | An electrocardiographic finding of an irregular, u or v shaped deflection within the contour of the T wave.   | T Wave Notched by ECG Finding  |
| C102684         | OLD OR AGE INDETERMINATE ANTERIOR WALL MYOCARDIAL INFARCTION           | Old Or Age Indeterminate Anterior Wall Myocardial Infarction           | An electrocardiographic finding of pathologic Q waves in leads V3 and V4, which is suggestive of myocardial infarction of the anterior wall of the left ventricle, without evidence of current or ongoing acute infarction.                                     | Old or Age Indeterminate Anterior Myocardial Infarction by ECG Finding           |
| C102685         | OLD OR AGE INDETERMINATE ANTEROLATERAL WALL MYOCARDIAL INFARCTION      | Old Or Age Indeterminate Anterolateral Wall Myocardial Infarction      | An electrocardiographic finding of pathologic Q waves in leads V3 through V6, which is suggestive of myocardial infarction of the anterolateral wall of the left ventricle, without evidence of current or ongoing acute infarction.                            | Old or Age Indeterminate Anterolateral Myocardial Infarction by ECG Finding      |
| C102686         | OLD OR AGE INDETERMINATE ANTEROSEPTAL WALL MYOCARDIAL INFARCTION       | Old Or Age Indeterminate Anteroseptal Wall Myocardial Infarction       | An electrocardiographic finding of pathologic Q waves in leads V1 through V4, which is suggestive of myocardial infarction of the anteroseptal wall of the left ventricle, without evidence of current or ongoing acute infarction.                             | Old or Age Indeterminate Anteroseptal Myocardial Infarction by ECG Finding       |
| C102687         | OLD OR AGE INDETERMINATE EXTENSIVE ANTERIOR WALL MYOCARDIAL INFARCTION | Old Or Age Indeterminate Extensive Anterior Wall Myocardial Infarction | An electrocardiographic finding of pathologic Q waves in leads V1 to V6, I and aVL, which is suggestive of myocardial infarction involving the anterior and anterolateral walls of the left ventricle, without evidence of current or ongoing acute infarction. | Old or Age Indeterminate Extensive Anterior Myocardial Infarction by ECG Finding |
| C102688         | OLD OR AGE INDETERMINATE HIGH LATERAL WALL MYOCARDIAL INFARCTION       | Old Or Age Indeterminate High Lateral Wall Myocardial Infarction       | An electrocardiographic finding of pathologic Q waves in leads I and aVL, which is suggestive of myocardial infarction of the high lateral wall of the left ventricle, without evidence of current or ongoing acute infarction.                                 | Old or Age Indeterminate High Lateral Myocardial Infarction by ECG Finding       |

| C71150 EGSTRESC |   |   |   |   |
|-----------------|---|---|---|---|
| NCI Code        | CDISC Submission Value  | CDISC Synonym   | CDISC Definition  | NCI Preferred Term  |
| C102689         | OLD OR AGE INDETERMINATE INFERIOR WALL MYOCARDIAL INFARCTION    | Old Or Age Indeterminate Inferior Wall Myocardial Infarction  | An electrocardiographic finding of pathologic Q waves in leads III, aVF and often II, which is suggestive of myocardial infarction of the inferior wall of the left ventricle, without evidence of current or ongoing acute infarction.   | Old or Age Indeterminate Inferior Myocardial Infarction by ECG Finding          |
| C102690         | OLD OR AGE INDETERMINATE LATERAL WALL MYOCARDIAL INFARCTION     | Old Or Age Indeterminate Lateral Wall Myocardial Infarction   | An electrocardiographic finding of pathologic Q waves in leads V5, V6, I and aVL, which is suggestive of myocardial infarction of the lateral wall of the left ventricle, without evidence of current or ongoing acute infarction.  | Old or Age Indeterminate Lateral Myocardial Infarction by ECG Finding           |
| C102691         | OLD OR AGE INDETERMINATE POSTERIOR WALL MYOCARDIAL INFARCTION   | Old Or Age Indeterminate Posterior Wall Myocardial Infarction | An electrocardiographic finding in leads V1 or V2 of an initial R wave duration greater than or equal to 40 ms, R wave greater than S wave, and upright T wave, which is suggestive of myocardial infarction of the posterior wall of the left ventricle, without evidence of current or ongoing acute infarction. Evidence of inferior or lateral myocardial infarction is usually also present. | Old or Age Indeterminate Posterior Myocardial Infarction by ECG Finding         |
| C102693         | OLD OR AGE INDETERMINATE SEPTAL WALL MYOCARDIAL INFARCTION      | Old Or Age Indeterminate Septal Wall Myocardial Infarction    | An electrocardiographic finding of pathologic Q waves in leads V1, V2 and often V3, which is suggestive of myocardial infarction of the intraventricular septum, without evidence of current or ongoing acute infarction.   | Old or Age Indeterminate Septal Myocardial Infarction by ECG Finding            |
| C101597         | OLD OR AGE INDETERMINATE WALL MYOCARDIAL INFARCTION             | Old Or Age Indeterminate Wall Myocardial Infarction           | An electrocardiographic finding of pathologic Q waves, which is suggestive of myocardial infarction of one or more regions of the heart, without evidence of current or ongoing acute infarction. No specification is provided for localization.  | Old Myocardial Infarction by ECG Finding  |
| C102692         | OLD OR AGE UNDETERMINED RIGHT VENTRICULAR MYOCARDIAL INFARCTION |   | An electrocardiographic finding, in the presence of an old or age indeterminate inferior wall myocardial infarction, of Q waves greater than or equal to 40 ms in duration in the right ventricular leads V4R through V6R.  | Old or Age Indeterminate Right Ventricular Myocardial Infarction by ECG Finding |
| C114176         | OTHER INCORRECT ELECTRODE PLACEMENT                             |   | An electrocardiographic recording in which one or more electrodes are incorrectly placed but further details are not provided.  | Other Incorrect Electrode Placement   |
| C90430          | P WAVE ABNORMALITY  | P Wave Abnormality  | An  | P Wave Abnormality by ECG   |

| C71150 EGSTRESC |                                     |   |   |   |

|                 |                                     |   | electrocardiographic finding for the P wave that is atypical either for the shape, duration, amplitude, axis or polarity. Abnormality of the P wave signifies aberrant propagation of the electrical impulse through the atria. (NCI) | Finding   |
| C90431          | P WAVE NOTCHED                      | P Wave Notched  | An electrocardiographic finding of P waves with two peaks longer in duration than normal and amplitude greater than normal.   | P Wave Notched by ECG Finding                     |
| C92232          | PACED ATRIAL AND VENTRICULAR RHYTHM | AV dual-paced complex(es) or rhythm;Paced Atrial And Ventricular Rhythm | An electrocardiographic finding in which both the atrial and ventricular rhythm are controlled by an electrical impulse from an artificial cardiac pacemaker.   | Paced Atrial And Ventricular Rhythm               |
| C92233          | PACED ATRIAL RHYTHM                 | Atrial-paced complex(es) or rhythm;Paced Atrial Rhythm                  | An electrocardiographic finding in which the atrial rhythm is controlled by an electrical impulse from an artificial cardiac pacemaker.   | Paced Atrial Rhythm                               |
| C88140          | PACED RHYTHM                        | Atrial and/or Ventricular Paced Rhythm;Paced Rhythm                     | An electrocardiographic finding in which the cardiac rhythm is controlled by an electrical impulse from an artificial cardiac pacemaker.  | Paced Rhythm                                      |
| C92234          | PACED VENTRICULAR RHYTHM            | Paced Ventricular Rhythm;Ventricular-paced complex(es) or rhythm        | An electrocardiographic finding in which the ventricular rhythm is controlled by an electrical impulse from an artificial cardiac pacemaker.  | Paced Ventricular Rhythm                          |
| C62250          | PAROXYSMAL AV BLOCK                 | Paroxysmal AV block   | An electrocardiographic finding of the sudden onset of transient AV block, which is often associated with preexisting conduction disorders.   | Paroxysmal Atrioventricular Block by ECG Finding  |
| C34902          | PAROXYSMAL VENTRICULAR TACHYCARDIA  | Paroxysmal Ventricular Tachycardia                                      | An episodic form of ventricular tachycardia, with abrupt onset and termination. (NCI)   | Paroxysmal Ventricular Tachycardia by ECG Finding |
| C119251         | PAUSE GREATER THAN 3.0 SECONDS      |   | An electrocardiographic finding of an RR interval with duration greater than 3.0 seconds, regardless of the underlying rhythm.  | Pause Greater Than Three Seconds by ECG Finding   |
| C119250         | PAUSE                               |   | An electrocardiographic finding of an RR interval which exceeds a predefined duration threshold, regardless of the underlying rhythm.   | Pause by ECG Finding                              |
| C114172         | POOR QUALITY ECG                    |   | An electrocardiographic recording that does not show proper quality for reasons that are not otherwise described.   | Poor Quality ECG                                  |
| C71033          | POOR R WAVE PROGRESSION             | Poor R Wave Progression   | An electrocardiographic   | Poor R Wave Progression by ECG Finding            |

| C71150 EGSTRESC |  |   |  |   |
|-----------------|--|---|--|---|
| NCI Code        | CDISC Submission Value                         | CDISC Synonym                                     | CDISC Definition   | NCI Preferred Term  |
| C35399          | POSTERIOR WALL MYOCARDIAL INFARCTION           | Posterior MI;Posterior Wall Myocardial Infarction | finding of a lack of progression of R wave height across precordial leads.<br>An electrocardiographic finding in leads V1 or V2 of an initial R wave duration greater than or equal to 40 ms, R wave greater than S wave, and upright T wave, which is suggestive of myocardial infarction of the posterior wall of the left ventricle. Evidence of inferior or lateral myocardial infarction is usually also present. | Posterior Myocardial Infarction by ECG Finding              |
| C116135         | PR SEGMENT DEPRESSION                          | PR Depression                                     | An electrocardiographic finding of PR segment depression below the iso-electric line in multiple precordial and/or limb leads.   | PR Segment Depression by ECG Finding                        |
| C34940          | PRE-EXCITATION                                 | Pre-excitation;Ventricular preexcitation          | An electrocardiographic finding characterized by a premature activation of the whole or some part of the ventricle. The PR interval is usually shortened and delta waves are frequently present.   | Pre-Excitation Syndrome                                     |
| C114153         | PRECARDIAL ELECTRODE V1 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V1 is disconnected resulting in missing waveforms (flat line) for lead V1.   | Disconnected Precordial Electrode V1 by ECG Finding         |
| C114154         | PRECARDIAL ELECTRODE V2 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V2 is disconnected resulting in missing waveforms (flat line) for lead V2.   | Disconnected Precordial Electrode V2 by ECG Finding         |
| C114155         | PRECARDIAL ELECTRODE V3 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V3 is disconnected resulting in missing waveforms (flat line) for lead V3.   | Disconnected Precordial Electrode V3 by ECG Finding         |
| C114156         | PRECARDIAL ELECTRODE V4 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V4 is disconnected resulting in missing waveforms (flat line) for lead V4.   | Disconnected Precordial Electrode V4 by ECG Finding         |
| C114157         | PRECARDIAL ELECTRODE V5 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V5 is disconnected resulting in missing waveforms (flat line) for lead V5.   | Disconnected Precordial Electrode V5 by ECG Finding         |
| C114158         | PRECARDIAL ELECTRODE V6 DISCONNECTED           |   | An electrocardiographic recording in which the electrode for lead V6 is disconnected resulting in missing waveforms (flat line) for lead V6.   | Disconnected Precordial Electrode V6 by ECG Finding         |
| C114160         | PRECARDIAL ELECTRODE(S) POSITIONED INCORRECTLY |   | An electrocardiographic recording in which   | Incorrectly Positioned Precordial Electrodes by ECG Finding |

| C71150 EGSTRESC |  |  |   |   |
|-----------------|--|--|---|---|
| NCI Code        | CDISC Submission Value                     | CDISC Synonym  | CDISC Definition  | NCI Preferred Term  |
|                 |  |  | one or more precordial electrodes are placed incorrectly with respect to the standard chest electrode positions resulting in improper representation of the affected leads.   |   |
| C114152         | PRECARDIAL ELECTRODES INTERCHANGED         | Precordial Lead Reversal   | An electrocardiographic recording in which two or more of the precordial electrodes are switched resulting in improper representation of the affected leads.  | Interchanged Precordial Electrodes by ECG Finding         |
| C102603         | PREMATURE ATRIAL COMPLEXES BLOCKED         | Atrial premature complexes, nonconducted;Non-conducted SVE;Premature Atrial Complex Blocked;Premature Atrial Complexes Non-conducted | An electrocardiographic finding of a premature atrial complexes that are is not conducted to the ventricles, and that are is not followed by a QRS complex; there may be one or more occurrences during an electrocardiographic recording.  | Blocked Atrial Premature Complex by ECG Finding           |
| C102672         | PREMATURE ATRIAL COMPLEXES MULTIFOCAL      | Multifocal Supraventricular Extra Beats;Multifocal SVE;Premature Atrial Complex Multifocal;Premature Atrial Complexes Multifocal     | An electrocardiographic finding of premature atrial complexes which have 2 or more distinct morphologies, suggesting origin at more than one atrial site.   | Multifocal Atrial Premature Complex by ECG Finding        |
| C102724         | PREMATURE ATRIAL COMPLEXES UNIFOCAL        | Premature Atrial Complex Unifocal  | An electrocardiographic finding of premature atrial complexes which have a single distinct morphology, suggesting origin at one atrial site.  | Unifocal Atrial Premature Complex by ECG Finding          |
| C62257          | PREMATURE ATRIAL COMPLEXES                 | APC;Atrial premature complex(es);PAC;Premature atrial complex;Supraventricular Extra Beat;Supraventricular Premature Beat;SVE        | An electrocardiographic finding of an ectopic impulse originating in the atria and not specifically in the sinus node. The P wave morphology of these complexes is often different from a sinus P wave and the RR intervals preceding these complexes is also shorter than those of the regular beats; there may be one or more occurrences during an electrocardiographic recording. | Atrial Premature Complex by ECG Finding                   |
| C107100         | PREMATURE VENTRICULAR COMPLEX INTERPOLATED | Interpolated VE;Interpolated Ventricular Extra Beat;Interpolated VES;Interpolated VPC;Premature Ventricular Complexes Interpolated   | An electrocardiographic finding of a premature ventricular complex which occurs between two normal QRS complexes which have normal timing; there may be one or more occurrences during an electrocardiographic recording.   | Interpolated Premature Ventricular Complex by ECG Finding |
| C62256          | PREMATURE VENTRICULAR COMPLEX              | Premature Ventricular Complexes;PVC;VE;Ventricular Extra Beat;Ventricular Premature Complexes;VES;VPC                                | An electrocardiographic finding of an ectopic impulse originating in the ventricles. The QRS morphology of these complexes is different from those of supraventricular  | Ventricular Premature Complex by ECG Finding              |

| C71150   | EGSTRESC                                   |  |   |   |  |
|----------|--|--|---|---|--|
| NCI Code | CDISC Submission Value                     | CDISC Synonym  | CDISC Definition  | NCI Preferred Term                                      |  |
|          |  |  | origin. The QRS duration is often longer and the RR interval preceding the complexes is usually shorter than that of supraventricular beats; there may be one or more occurrences during an electrocardiographic recording. |   |  |
| C102673  | PREMATURE VENTRICULAR COMPLEXES MULTIFOCAL | Multifocal Ventricular Extra Beats;Multifocal VES;Multifocal VPCS;Premature Ventricular Complex Multifocal | An electrocardiographic finding of premature ventricular complexes which have two or more distinct morphologies, suggesting origin at more than one ventricular site.   | Multifocal Ventricular Premature Complex by ECG Finding |  |
| C102725  | PREMATURE VENTRICULAR COMPLEXES UNIFOCAL   | Premature Ventricular Complex Unifocal;Unifocal Ventricular Extra Beats;Unifocal VES;Unifocal VPCS         | An electrocardiographic finding of premature ventricular complexes which have a single distinct morphology, suggesting origin at one ventricular site.  | Unifocal Ventricular Premature Complex by ECG Finding   |  |
| C71034   | PROLONGED QT                               | Prolonged QT;Prolonged QT interval   | An electrocardiographic finding in which the QT interval not corrected for heart rate is prolonged. Thresholds for different age, gender, and patient populations exist.  | Prolonged QT Interval by ECG Finding                    |  |
| C116137  | PROLONGED ST SEGMENT                       |  | An electrocardiographic finding of a prolonged ST segment, resulting in a long QT interval, without lengthening of the T wave duration.   | Prolonged ST Segment by ECG Finding                     |  |
| C71094   | Q AXIS, LEFT AXIS DEVIATION                | Left-axis deviation;Q Axis, Left axis deviation;QRS axis, left axis deviation                              | An electrocardiographic finding of a frontal plane QRS axis from -30 to -90 degrees.  | Q Axis Left Axis Deviation                              |  |
| C71095   | Q AXIS, RIGHT AXIS DEVIATION               | Q Axis, Right axis deviation;QRS axis, right axis deviation;Right-axis deviation                           | An electrocardiographic finding of a frontal plane QRS axis from +90 to +180 degrees.   | Q Axis Right Axis Deviation                             |  |
| C90440   | QRS COMPLEX ABNORMALITY                    | QRS Complex Abnormality  | An electrocardiographic finding of a non-specific abnormality of the QRS complex, which is atypical in shape, duration, amplitude, axis or polarity.  | QRS Complex Abnormality by ECG Finding                  |  |
| C83817   | QTC PROLONGATION                           | QTc Prolongation   | An electrocardiographic finding in which the QTc interval corrected for heart rate is prolonged. Thresholds for different age, gender, and patient populations exist.   | Corrected Prolonged QT Interval by ECG Finding          |  |
| C107098  | QTcB PROLONGATION                          | PROLONGED QTcB   | An electrocardiographic finding in which the QT interval corrected for heart rate using Bazett's formula is prolonged. Thresholds for different age, gender, and patient populations exist.                                 | QTcB Prolongation                                       |  |
| C107099  | QTcF PROLONGATION                          | PROLONGED QTcF   | An electrocardiographic finding in which the  | QTcF Prolongation                                       |  |

| C71150 EGSTRESC |   |  |   |   |
|-----------------|---|--|---|---|
| NCI Code        | CDISC Submission Value  | CDISC Synonym  | CDISC Definition  | NCI Preferred Term  |
| C114161         | QUALITY PROBLEM NOT OTHERWISE SPECIFIED                         | Unknown Quality Problem  | QT interval corrected for heart rate using Fridericia's formula is prolonged. Thresholds for different age, gender, and patient populations exist. An electrocardiographic artifact or recording error with unknown origin or which is not described otherwise.   | Quality Problem Not Otherwise Specified by ECG Finding          |
| C61395          | R ON T PHENOMENON   | R on T phenomenon  | An electrocardiographic finding in which the R wave of a premature ventricular complex occurs on top of the T wave of the preceding beat.   | R On T Phenomenon by ECG Finding                                |
| C90444          | R WAVE NOTCHED  | R Wave Notched   | An electrocardiographic finding of an R wave variant in which there is a small deflection of the R wave, with changing polarity, within the QRS complex. (NCI)  | R Wave Notched by ECG Finding                                   |
| C102706         | REPOLARIZATION ABNORMALITY SECONDARY TO VENTRICULAR HYPERTROPHY | Repolarization Abnormality Secondary To Ventricular Hypertrophy;ST-T change due to ventricular hypertrophy | An electrocardiographic finding of ST depression and T wave inversion in the presence of increased QRS amplitude which are thought to be due to left ventricular hypertrophy.   | Repolarization Abnormality Secondary To Ventricular Hypertrophy |
| C102574         | REPOLARIZATION ABNORMALITY                                      | Repolarization Abnormality   | An electrocardiographic finding of an abnormality of T wave duration or morphology or of early repolarization.  | Ventricular Repolarization Abnormality                          |
| C71041          | RIGHT ATRIAL ABNORMALITY  | P-pulmonale;Right Atrial Enlargement   | An electrocardiographic finding suggesting underlying hypertrophy or dilatation of the right atrium. Electrocardiographic criteria used for the diagnosis of right atrial abnormality may include a peaked p wave greater than 2.5 millimeters in amplitude in the inferior leads. (NCI)  | P-pulmonale by ECG Finding                                      |
| C62270          | RIGHT BUNDLE BRANCH BLOCK                                       | Complete RBBB;Right bundle branch block;Right bundle-branch block  | An electrocardiographic finding of a wide QRS complex with evidence of delayed conduction to the right ventricle, manifest by a widened initial portion of the QRS in V1 and V2, a widened S wave in V5, V6, I and aVL, and with QRS duration greater than or equal to 120 ms. An RsR' complex is typically present in leads V1 and V2. | Right Bundle Branch Block by ECG Finding                        |
| C92235          | RIGHT VENTRICULAR CONDUCTION DELAY                              | Right Ventricular Conduction Delay;Right Ventricular Delay   | An electrocardiographic finding in which there is evidence that electrical transmission through the right ventricle is impaired with a maximal QRS duration of 110 ms and which does not  | Right Ventricular Conduction Delay by ECG Finding               |

| C71150 EGSTRESC |                               |                               |   |  |
|-----------------|-------------------------------|-------------------------------|---|--|
| NCI Code        | CDISC Submission Value        | CDISC Synonym                 | CDISC Definition  | NCI Preferred Term                           |
| C71077          | RIGHT VENTRICULAR HYPERTROPHY | Right ventricular Hypertrophy | meet the criteria for Incomplete Right Bundle Branch Block.<br>An electrocardiographic finding suggestive of a hypertrophied right ventricle, characterized by large R wave amplitudes in the right precordial leads and secondary findings of right atrial enlargement, right axis deviation, and typical pattern of ST depression and T wave inversion in the right precordial leads. | Right Ventricular Hypertrophy by ECG Finding |
| C92227          | RSR PRIME                     | RSR'                          | An electrocardiographic finding in which there are two R waves, which are two deflections above the baseline resulting from a single ventricular depolarization. The first upward deflection in the complex is the R wave. The S is the first downward deflection. A second upward deflection is called the R-prime wave.   | RSR' by ECG Finding                          |
| C35519          | SEPTAL MYOCARDIAL INFARCTION  | Septal myocardial infarction  | An electrocardiographic finding suggesting an infarction in the anatomic location of the cardiac septum. (NCI)  | Septal Myocardial Infarction by ECG Finding  |
| C62246          | SHORT PR INTERVAL             | Short PR interval             | An electrocardiographic finding of an abnormally short PR interval. Thresholds for different age, gender, and patient populations exist.  | Short PR Interval by ECG Finding             |
| C102709         | SHORT QTC INTERVAL            | Short QTc Interval            | An electrocardiographic finding of a QT interval corrected for heart rate that is shorter than the lower limit of normal. Thresholds for different age, gender, and patient populations exist.  | Short QTc Interval                           |
| C112402         | SHORT QTcB                    |                               | An electrocardiographic finding in which the QT interval corrected for heart rate using Bazett's formula is shortened. Thresholds for different age, gender, and patient populations exist.   | QTcB Shortened                               |
| C112403         | SHORT QTcF                    |                               | An electrocardiographic finding in which the QT interval corrected for heart rate using Fridericia's formula is shortened. Thresholds for different age, gender, and patient populations exist.   | QTcF Shortened                               |
| C116136         | SHORT ST SEGMENT              |                               | An electrocardiographic finding of a short or absent ST segment, resulting in a short QT interval, without  | Short ST Segment by ECG Finding              |

| C71150 EGSTRESC |                           |   |   |  |
|-----------------|---------------------------|---|---|--|
| NCI Code        | CDISC Submission Value    | CDISC Synonym                                   | CDISC Definition  | NCI Preferred Term                       |
| C50553          | SINOATRIAL EXIT BLOCK     | SA Block;Sinoatrial Block;Sinoatrial exit block | changes in T wave morphology.<br>An electrocardiographic finding in which impaired conduction or automaticity within the sinus node results in the failure of impulse transmission from the sinoatrial node. This is manifest as dropped P waves during sinus rhythm. | Exit Block by ECG Finding                |
| C62242          | SINUS ARREST/PAUSE        | Sinus arrest/pause;Sinus pause or arrest        | An electrocardiographic finding in which a failure of impulse formation or conduction in the sinus node produces prolongation of the P-P interval or dropped P waves. The threshold for the prolongation of the P-P interval is not well defined.                     | Sinus Arrest by ECG Finding              |
| C62239          | SINUS ARRHYTHMIA          | Respiratory Sinus Arrhythmia;Sinus arrhythmia   | An electrocardiographic finding in which the sinus rate fluctuates with the respiratory cycle.  | Sinus Arrhythmia by ECG Finding          |
| C111097         | SINUS BRADYCARDIA         | Sinus bradycardia                               | An electrocardiographic finding of abnormally slow heart rate with its origin in the sinus node. Thresholds for different age, gender, and patient populations exist.   | Sinus Bradycardia by ECG Finding         |
| C100076         | SINUS RHYTHM              | Sinus Rhythm                                    | An electrocardiographic finding of an atrial rhythm which originates from the sinoatrial node that is considered normal for the population.   | Sinus Rhythm                             |
| C111104         | SINUS TACHYCARDIA         | Sinus tachycardia                               | An electrocardiographic finding of abnormally rapid heart rate with its origin in the sinus node. Thresholds for different age, gender, and patient populations exist.  | Sinus Tachycardia by ECG Finding         |
| C41330          | ST DEPRESSION             | ST depression                                   | An electrocardiographic finding of ST segment depression below the baseline, often described as up sloping, down sloping or horizontal. (NCI)   | ST Segment Depression by ECG Finding     |
| C71029          | ST ELEVATION PERICARDITIS | ST elevation pericarditis                       | An electrocardiographic finding of ST elevation which is concave upwards, and which is often accompanied by PR segment depression.  | ST Elevation Pericarditis by ECG Finding |
| C50540          | ST ELEVATION              | ST elevation                                    | An electrocardiographic finding of ST segment elevation above the baseline. (NCI)   | ST Segment Elevation by ECG Finding      |
| C161046         | SUPRAVENTRICULAR BIGEMINY |   | An electrocardiographic finding of a supraventricular QRS complex followed by a premature supraventricular complex for 3 or more consecutive cycles; a  | Supraventricular Bigeminy by ECG Finding |

| C71150 EGSTRESC |  |   |   |   |
|-----------------|--|---|---|---|
| NCI Code        | CDISC Submission Value   | CDISC Synonym   | CDISC Definition  | NCI Preferred Term  |
| C119252         | SUPRAVENTRICULAR COUPLETT  |   | regularly irregular rhythm of normal and abnormal QRS complexes in a 1-1 ratio.<br>An electrocardiographic finding in which two premature atrial complexes occur sequentially.  | Supraventricular Couplet by ECG Finding   |
| C135395         | SUPRAVENTRICULAR ESCAPE BEAT   | Supraventricular Escape Complex;Supraventricular Escape Complexes | An electrocardiographic finding of a compensatory supraventricular complex that occurs following a prolonged RR interval.   | Supraventricular Escape Beat by ECG Finding   |
| C142246         | SUPRAVENTRICULAR PREMATURE COMPLEX, ORIGIN UNKNOWN                   | Supraventricular Premature Complexes, Origin Unknown              | An electrocardiographic finding of an ectopic impulse originating from the atria or AV junction for which the site of origin cannot be determined from the surface electrocardiographic recording; there may be one or more occurrences during an electrocardiographic recording. | Supraventricular Premature Complex With Unknown Origin by ECG Finding                       |
| C120618         | SUPRAVENTRICULAR RUN   |   | An electrocardiographic finding of three or more consecutive beats of supraventricular origin without reference to rate.  | Supraventricular Run by ECG Finding   |
| C111100         | SUPRAVENTRICULAR TACHYCARDIA   | Supraventricular tachycardia                                      | An electrocardiographic finding of a tachycardia which does not originate in the ventricles or His Purkinje system. There is an abnormally high heart rate and QRS complexes are typically narrow, but aberration or preexcitation may be present.                                | Supraventricular Tachycardia by ECG Finding   |
| C161047         | SUPRAVENTRICULAR TRIGEMINY   |   | An electrocardiographic finding of two supraventricular QRS complexes followed by a premature supraventricular complex for 3 or more consecutive cycles; a regularly irregular rhythm of normal and abnormal QRS complexes in a 2-1 ratio.  | Supraventricular Trigeminy by ECG Finding   |
| C114173         | SUSPECT LIMB ELECTRODES REVERSED, INTERPRETATION ASSUMES NO REVERSAL |   | An electrocardiographic recording in which an interchange of one or more limb lead electrodes is suspected, but for which an interpretation is performed as though the lead placement is correct.   | Suspicion of Limb Electrodes Reversal But Interpretation Assumes No Reversal by ECG Finding |
| C114174         | SUSPECT LIMB ELECTRODES REVERSED, INTERPRETATION ASSUMES REVERSAL    |   | An electrocardiographic recording in which an interchange of one or more limb lead electrodes is suspected, and for which an  | Suspicion of Limb Electrodes Reversal But Interpretation Assumes Reversal by ECG Finding    |

| C71150 EGSTRESC |                                      |  |  |   |
|-----------------|--------------------------------------|--|--|---|
| NCI Code        | CDISC Submission Value               | CDISC Synonym  | CDISC Definition   | NCI Preferred Term                                  |
| C71052          | SUSTAINED VENTRICULAR TACHYCARDIA    | Sustained ventricular tachycardia                                | interpretation is performed as though the leads have in fact been interchanged.<br>An electrocardiographic finding of ventricular tachycardia greater than 30 seconds in duration. (NCI)   | Sustained Ventricular Tachycardia by ECG Finding    |
| C102718         | T WAVE ALTERNANS                     | T Wave Alternans   | An electrocardiographic finding in which there are variations in the shape, amplitude, or direction of the T wave from one beat to the next.   | T Wave Alternans by ECG Finding                     |
| C71085          | T WAVE INVERSION                     | T Wave Inversion   | An electrocardiographic finding of an inversion of the T wave from the expected axis. (NCI)  | T Wave Inversion by ECG Finding                     |
| C71086          | T WAVE PEAKED                        | T wave peaked  | An electrocardiographic finding in which the T wave appears increased in amplitude and cresting at a point. (NCI)  | T Wave Peaked by ECG Finding                        |
| C71087          | T WAVES BIPHASIC                     | T waves biphasic   | An electrocardiographic finding of a T wave with both positive and negative components.  | T Waves Biphasic by ECG Finding                     |
| C71088          | T WAVES FLAT                         | T waves flat   | An electrocardiographic finding in which the T wave appears decreased in amplitude. (NCI)  | T Waves Flat by ECG Finding                         |
| C111121         | TACHYCARDIA                          | Tachycardia  | An electrocardiographic finding of abnormally rapid heart rate. Thresholds for different age, gender, and patient populations exist.   | Tachycardia by ECG Finding                          |
| C50779          | TORSADES DE POINTES                  | Torsades de pointes;Ventricular tachycardia, torsades de pointes | An electrocardiographic finding of an atypical rapid polymorphic ventricular tachycardia with a characteristic rotation of the QRS complex around the isoelectric baseline, occurring in the setting of a prolonged QT interval. In addition, the QRS complex displays a periodic waxing and waning of amplitude on the electrogram. | Torsades De Pointes by ECG Finding                  |
| C106579         | U WAVE ABNORMALITY                   | Abnormal U Wave  | An electrocardiographic finding of U waves which have increased amplitude, are inverted, or merged with the preceding T wave.  | U Wave Abnormality by ECG Finding                   |
| C114170         | UNABLE TO DIGITIZE ECG LEADS         |  | A statement indicating the inability to digitize a paper ECG.  | Inability to Digitize ECG Leads                     |
| C116131         | UNDETERMINED RHYTHM                  |  | An electrocardiographic finding of a cardiac rhythm whose mechanism cannot be determined from the ECG.   | Undetermined Rhythm by ECG Finding                  |
| C120607         | UNDETERMINED SUPRAVENTRICULAR RHYTHM |  | An electrocardiographic finding of a rhythm which does not   | Undetermined Supraventricular Rhythm by ECG Finding |

| C71150<br>NCI<br>Code | EGSTRESC<br>CDISC Submission Value | CDISC Synonym  | CDISC Definition   | NCI Preferred Term                      |
|-----------------------|------------------------------------|--|--|---|
|                       |                                    |  | originate in the ventricles or His Purkinje system, but whose specific electrophysiologic mechanism cannot be determined from the ECG. The QRS complexes are typically narrow, but aberration or preexcitation may be present.   |   |
| C71054                | VENTRICULAR BIGEMINY               | Bigeminy   | An electrocardiographic finding of a normal QRS complex followed by a premature ventricular complex for 3 or more consecutive cycles; a regularly irregular rhythm of normal and abnormal QRS complexes in a 1-1 ratio.  | Ventricular Bigeminy by ECG Finding     |
| C62259                | VENTRICULAR COUPLET                | Ventricular Couplets;Ventricular Pair  | An electrocardiographic finding in which two premature ventricular complexes occur sequentially; there may be one or more occurrences during an electrocardiographic recording.  | Ventricular Couplet by ECG Finding      |
| C90483                | VENTRICULAR ESCAPE BEAT            | Ventricular Escape Beats;Ventricular Escape Complex;Ventricular Escape Complexes | An electrocardiographic finding of a compensatory ventricular complex that occurs following a prolonged RR interval; there may be one or more occurrences during an electrocardiographic recording.  | Ventricular Escape Beat by ECG Finding  |
| C111102               | VENTRICULAR FIBRILLATION           | Ventricular fibrillation   | An electrocardiographic finding of a rapid grossly irregular ventricular rhythm with marked variability in QRS cycle length, morphology, and amplitude. The rate is typically greater than 300 bpm.  | Ventricular Fibrillation by ECG Finding |
| C111115               | VENTRICULAR FLUTTER                | Ventricular flutter  | A ventricular tachyarrhythmia characterized by a high ventricular rate (180 to 250 beats per minute) with a regular rhythm. The electrocardiogram shows large oscillating sine wave-like complexes occurring as a result of QRS complexes and T waves being merged. The P wave is not visible. (NCI) | Ventricular Flutter by ECG Finding      |
| C102728               | VENTRICULAR PARASYSTOLE            | Parasystole;Ventricular Parasystole  | An electrocardiographic finding of normal sinus rhythm coexisting with a regular ectopic ventricular rhythm.   | Ventricular Parasystole by ECG Finding  |
| C120621               | VENTRICULAR RUN                    |  | An electrocardiographic finding of three or more consecutive beats of ventricular origin without reference to rate.  | Ventricular Run by ECG Finding          |
| C111103               | VENTRICULAR TACHYCARDIA            | Ventricular tachycardia  | An electrocardiographic  | Ventricular Tachycardia by ECG Finding  |

| C71150 EGSTRESC |  |  |  |  |
|-----------------|--|--|--|--|
| NCI Code        | CDISC Submission Value   | CDISC Synonym  | CDISC Definition   | NCI Preferred Term   |
| C62234          | VENTRICULAR TACHYCARDIA, MONOMORPHIC   | Ventricular tachycardia, monomorphic                                       | finding of three or more consecutive complexes of ventricular origin with a rate greater than a certain threshold (100 or 120 beats per minute are commonly used). The QRS complexes are wide and have an abnormal morphology.<br>An electrocardiographic finding of a ventricular tachycardia in which the QRS complexes have a uniform morphology. | Monomorphic Ventricular Tachycardia by ECG Finding                                       |
| C62236          | VENTRICULAR TACHYCARDIA, POLYMORPHIC   | Ventricular tachycardia, polymorphic;Ventricular tachycardia, polymorphous | An electrocardiographic finding of a ventricular tachycardia in which the QRS complexes have a variable morphology and often rate.   | Polymorphic Ventricular Tachycardia by ECG Finding                                       |
| C71055          | VENTRICULAR TRIGEMINY  | Trigeminy  | An electrocardiographic finding of two normal QRS complexes followed by a premature ventricular complex for 3 or more consecutive cycles; a regularly irregular rhythm of normal and abnormal QRS complexes in a 2-1 ratio.  | Ventricular Trigeminy by ECG Finding   |
| C130067         | VOLTAGE CRITERIA SUGGESTING LEFT VENTRICULAR HYPERTROPHY, WITHOUT SECONDARY ECG FINDINGS |  | An electrocardiographic finding of large QRS amplitudes which may indicate left ventricular hypertrophy, but in the absence of any of the secondary findings which are typical of this diagnosis (left atrial enlargement, left axis deviation, or typical pattern of ST depression and T wave inversion).   | Voltage Criteria Suggesting Left Ventricular Hypertrophy, Without Secondary ECG Findings |
| C62240          | WANDERING ATRIAL PACEMAKER   | Wandering atrial pacemaker   | An electrocardiographic finding of a supraventricular arrhythmia characterized by 3 or more distinct P wave morphologies with an isoelectric baseline, variable PR intervals and no predominant atrial rhythm. The ventricular rate is typically below 100 beats per minute.   | Wandering Atrial Pacemaker by ECG Finding  |
| C71090          | WIDE QRS TACHYCARDIA   | Wide QRS tachycardia;Wide-QRS tachycardia                                  | An electrocardiographic finding of three or more consecutive wide QRS complexes of uncertain origin with a rate greater than a certain threshold (100 or 120 beats per minute are commonly used).  | Wide QRS Tachycardia by ECG Finding  |
| C35132          | WOLFF-PARKINSON-WHITE SYNDROME   | Wolff-Parkinson-White syndrome;WPW   | An electrocardiographic finding of ventricular pre-excitation. The syndrome is characterized by a short PR interval and  | Wolff-Parkinson-White Syndrome   |

| C116140       | Acute Myocardial Ischemia ECG Change | Acute Myocardial Ischemia ECG Change | An electrocardiographic finding assessment of new or presumed new significant ST-segment-T wave (ST-T) changes or new left bundle branch block consistent with acute myocardial ischemia. (Thygesen K, Alpert JS, Jaffe AS, Simoons ML, et al.; Joint ESC/ACCF/AHA/WHF Task Force for Universal Definition of Myocardial Infarction. Third universal definition of myocardial infarction. J Am Coll Cardiol. 2012 Oct 16;60(16):1581-98). | Acute Myocardial Ischemia by ECG Assessment       |
| C111131       | Atrioventricular Conduction          | Atrioventricular Conduction          | An electrocardiographic assessment of cardiac atrioventricular conduction.  | Atrioventricular Conduction ECG Assessment        |
| C111132       | Axis and Voltage                     | Axis and Voltage                     | An electrocardiographic assessment of mean cardiac electrical vector and the ECG voltage.   | Axis and Voltage ECG Assessment                   |
| C111155       | Chamber Hypertrophy or Enlargement   | Chamber Hypertrophy or Enlargement   | An electrocardiographic assessment of chamber hypertrophy or enlargement.   | Chamber Hypertrophy or Enlargement ECG Assessment |
| C117761       | Comparison to a Prior ECG            | Comparison to a Prior ECG            | A comparative interpretation of an ECG relative to a previous (comparator) ECG. The definition of the comparator ECG may be specified elsewhere. Common comparator result values include improved, no change, deteriorated.   | Comparison to a Prior ECG                         |
| C119253       | ECG Maximum Atrial Rate              | ECG Maximum Atrial Rate              | An electrocardiographic measurement of the maximum rate of atrial depolarizations (P waves) recorded during an interval of time, usually expressed in beats per minute.   | Maximum Atrial Rate by Electrocardiogram          |
| C119257       | ECG Maximum Heart Rate               | ECG Maximum Heart Rate               | An electrocardiographic measurement of the maximum rate of depolarization of a specific region of the heart during an interval of time, usually expressed in beats per minute. Unless otherwise specified, this is usually the maximum ventricular rate.  | Maximum Heart Rate by Electrocardiogram           |
| C119260       | ECG Maximum Ventricular Rate         | ECG Maximum Ventricular Rate         | An electrocardiographic measurement of the maximum rate of ventricular depolarizations (QRS complexes) recorded during an interval of time, usually expressed in beats per minute.  | Maximum Ventricular Rate by Electrocardiogram     |

C71152 EGTEST

|----------|-----------------------------|-----------------------------|--|--|
| C119256  | ECG Mean Atrial Rate        | ECG Mean Atrial Rate        | An electrocardiographic measurement of the average rate of atrial depolarizations (P waves) recorded during an interval of time, usually expressed in beats per minute.  | Mean Atrial Rate by Electrocardiogram        |
| C119259  | ECG Mean Heart Rate         | ECG Mean Heart Rate         | An electrocardiographic measurement of the average rate of depolarization of a specific region of the heart during an interval of time, usually expressed in beats per minute. Unless otherwise specified, this is usually the mean ventricular rate.  | Mean Heart Rate by Electrocardiogram         |
| C119263  | ECG Mean Ventricular Rate   | ECG Mean Ventricular Rate   | An electrocardiographic measurement of the average rate of ventricular depolarizations (QRS complexes) recorded during an interval of time, usually expressed in beats per minute.   | Mean Ventricular Rate by Electrocardiogram   |
| C119254  | ECG Median Atrial Rate      | ECG Median Atrial Rate      | An electrocardiographic measurement of the median rate of atrial depolarizations (P waves) recorded during an interval of time, usually expressed in beats per minute.   | Median Atrial Rate by Electrocardiogram      |
| C123447  | ECG Median Heart Rate       | ECG Median Heart Rate       | An electrocardiographic measurement of the median rate of depolarization of a specific region of the heart during an interval of time, usually expressed in beats per minute. Unless otherwise specified, this is usually the median ventricular rate. | ECG Median Heart Rate                        |
| C119261  | ECG Median Ventricular Rate | ECG Median Ventricular Rate | An electrocardiographic measurement of the median rate of ventricular depolarizations (QRS complexes) recorded during an interval of time, usually expressed in beats per minute.  | Median Ventricular Rate by Electrocardiogram |
| C119255  | ECG Minimum Atrial Rate     | ECG Minimum Atrial Rate     | An electrocardiographic measurement of the minimum rate of atrial depolarizations (P waves) recorded during an interval of time, usually expressed in beats per minute.  | Minimum Atrial Rate by Electrocardiogram     |
| C119258  | ECG Minimum Heart Rate      | ECG Minimum Heart Rate      | An electrocardiographic measurement of the minimum rate of depolarization of a specific region of the heart during an interval of time, usually expressed in beats per minute. Unless otherwise specified, this is                                     | Minimum Heart Rate by Electrocardiogram      |

(Thygesen K, Alpert JS, Jaffe AS, Simoons ML, et al.; Joint ESC/ACCF/AHA/WHF Task Force for Universal Definition of Myocardial Infarction. Third universal definition of myocardial infarction. J Am Coll Cardiol. 2012 Oct 16;60(16):1581-98).  |                                |
| C118164  | P_AXIS                 | P Wave Axis  | A numerical representation of the electrocardiographic vector assessed at maximum deviation of the P wave from the isoelectric baseline, usually reported for the frontal plane.   | P Wave Axis                    |
| C111285  | PACEMAKR               | Pacemaker  | An electrocardiographic assessment of presence of artificial electronic pacing.  | Pacemaker ECG Assessment       |
| C117771  | PPAG                   | PP Interval, Aggregate                             | An aggregate PP value based on the measurement of PP intervals from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean.  | Aggregate PP Interval          |
| C117772  | PPSM                   | PP Interval, Single Measurement                    | An electrocardiographic measurement of the interval between the onsets of two consecutive P waves.   | Single Measurement PP Interval |
| C117773  | PRAG                   | PQ Interval, Aggregate;PQAG;PR Interval, Aggregate | An aggregate PR value based on the measurement of PR intervals from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean.  | Aggregate PR Interval          |
| C62131   | PRMAX                  | Summary (Max) PR Duration                          | The maximum duration (time) of the PR interval, obtained from a set of measurements of the PR interval. The PR interval is defined as the time from the beginning of the P wave (representing the onset of atrial depolarization) to the beginning of the R wave (representing the onset of ventricular depolarization). In some cases, a Q wave will precede the R wave, in which case the PR interval is measured from the beginning of the P wave to the beginning of the Q wave. (NCI) | Maximum PR Duration            |
| C62125   | PRMIN                  | Summary (Min) PR Duration                          | The minimum duration (time) of the PR interval, obtained from a set of measurements of the PR interval. The PR interval is defined as  | Minimum PR Duration            |

This is usually reported in millivolt.  | Minimum ST Segment Elevation                  |
| C117802            | STESB                              | ST Segment Elevation, Single Beat | An electrocardiographic measurement of the mean amplitude (usually measured in mV) of the ST segment elevation above the isoelectric baseline measured from the baseline to the ST segment of a single beat utilizing one or more leads. Based on the recording gain, this measurement may also be reported in mm.   | ST Segment Elevation Single Beat              |
| C117803            | STSDURAG                           | ST Segment Duration, Aggregate    | An aggregate ST segment duration value based on the measurement of ST segment duration intervals from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean.  | ST Segment Duration Aggregate                 |
| C117804            | STSDURSB                           | ST Segment Duration, Single Beat  | An electrocardiographic interval measured from the J point to the onset of the T wave of a single beat utilizing one or more leads.  | ST Segment Duration Single Beat               |
| C111363            | STSTWUW                            | ST Segment, T wave, and U wave    | An electrocardiographic assessment of the  | ST Segment, T wave, and U wave ECG Assessment |

| C71153 EGTESTCD |                        |                                  |  |                                   |  |

| C117805         | SWAAG                  | S Wave Amplitude, Aggregate      | characteristics of the ST segment, T wave, and U wave.<br>An aggregate S wave amplitude value based on the measurement of S wave amplitudes from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean. | S Wave Amplitude Aggregate        |  |
| C117806         | SWASB                  | S Wave Amplitude, Single Beat    | An electrocardiographic measurement of the mean amplitude (usually measured in mm) of the S wave measured from the isoelectric baseline to the peak of the S wave of a single beat utilizing one or more leads. Based on the recording gain, this measurement is reported in millivolt.      | S Wave Amplitude Single Beat      |  |
| C118166         | T_AXIS                 | T Wave Axis                      | A numerical representation of the electrocardiographic vector assessed at maximum deviation of the T wave from the isoelectric baseline, usually reported for the frontal plane.   | T Wave Axis                       |  |
| C117807         | TECHQUAL               | Technical Quality                | A statement about an electrocardiographic recording describing technical issues or interference during the recording, processing, or transmission of the data. This does not represent an electrocardiographic diagnosis.  | ECG Technical Quality             |  |
| C117808         | TPTEAG                 | Tpeak-Tend Interval, Aggregate   | An aggregate Tpeak-Tend value based on the measurement of Tpeak-Tend from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean.  | T Peak-T End Interval Aggregate   |  |
| C117809         | TPTESB                 | Tpeak-Tend Interval, Single Beat | An electrocardiographic interval measured from the peak of the T wave to the offset of the T wave of a single beat utilizing one or more leads.  | T Peak-T End Interval Single Beat |  |
| C117810         | TWARAG                 | T Wave Area, Aggregate           | An aggregate T wave area value based on the measurement of T wave areas from multiple beats within a single ECG. The method of aggregation, which can vary, is typically a measure of central tendency such as the mean.   | T Wave Area Aggregate             |  |
| C117811         | TWARSB                 | T Wave Area, Single Beat         | An electrocardiographic measurement of the area of the T wave of a single beat utilizing one or more leads.  | T Wave Area Single Beat           |  |
| C117812         | TWDURAG                | T Wave Duration, Aggregate       | An aggregate T wave  | T Wave Duration Aggregate         |  |

| C124329  | Number of Moderate Episodes          | Number of Moderate Episodes                                 | The number of times an event, which is classified as moderate, occurred.  | Number of Moderate Episodes                            |
| C174275  | Number of Objects                    | Number of Objects   | The number of objects observed.   | Number of Objects                                      |
| C174228  | Number of Procedures Performed       | Number of Procedures Performed                              | The number of procedures performed on or in an individual.  | Number of Procedures Performed                         |
| C124330  | Number of Severe Episodes            | Number of Severe Episodes                                   | The number of times an event, which is classified as severe, occurred.  | Number of Severe Episodes                              |
| C172479  | Number of Steps Taken                | Number of Steps Taken                                       | The number of footsteps taken by an individual.   | Number of Steps Taken                                  |
| C174274  | Number of Strictures                 | Number of Strictures  | The number of anatomical strictures observed.   | Number of Strictures                                   |
| C127786  | Occurrence Indicator                 | Occurrence Indicator  | An indication as to whether something has happened, such as an event or incident.   | Occurrence Indicator                                   |
| C117885  | Onset Unifocal or Multifocal         | Onset Unifocal or Multifocal                                | A categorization of the number of lesions present in the Central Nervous System at the time of diagnosis of a specific disease. | Focality of Disease Onset                              |
| C154860  | Origin of Cancer Known Ind           | Origin of Cancer Known Ind;Origin of Cancer Known Indicator | An indication as to whether the primary site of cancer is known.  | Cancer Primary Site Known Indicator                    |
| C181318  | Pathologic Appearance of Biopsy Site | Pathologic Appearance of Biopsy Site                        | A description of the appearance of the anatomical site from which a biopsy specimen has been collected.                         | Pathologic Appearance of Biopsy Site                   |
| C119239  | PCI Acute Angiographic Complication  | PCI Acute Angiographic Complication                         | Categorization of the type of acute PCI angiographic  | Acute Myocardial Infarction From PCI Complication Type |

| NCI Code | CDISC Submission Value                   | CDISC Synonym  | CDISC Definition   | NCI Preferred Term  |
|----------|--|--|--|---|
| C163413  | Precipitating Factor                     | Precipitating Factor   | complication resulting in acute myocardial ischemia.<br>The factor that causes or triggers the onset of an occurrence. | Precipitating Factor  |
| C170562  | Prepared Amount                          | Prepared Amount  | The quantity of a product that has been made ready for use.  | Prepared Amount   |
| C184724  | Prevents Daily Activities Indicator      | Prevents Daily Activities Indicator  | An indication as to whether the event or intervention prevents or has prevented the performance of daily activities.   | Prevents Daily Activities Indicator                           |
| C179451  | Primary Site of Tumor Origin             | Primary Site of Tumor Origin   | The anatomical location of the primary tumor site of disease.  | Primary Tumor Site  |
| C119240  | Procedure Success Indicator              | Procedure Success Indicator  | An indication as to whether the procedure is considered successful.  | Procedure Success Indicator                                   |
| C101230  | Procedure Urgency Status Type            | Procedure Urgency Status Type  | The degree of urgency in which a medical procedure must be performed.  | Triage Status   |
| C170617  | QOL Impact                               | QOL Impact;Quality of Life Impact  | The effect or consequence of an event or condition on an individual's sense of well-being and ability to enjoy life.   | Quality of Life Impact  |
| C176283  | Relapse after Discon Dependent Indicator | Relapse after Discon Dependent Indicator;Relapse after Discontinue Dependent Indicator | An indication as to whether an individual has had a relapse after discontinuation of a substance due to dependence.    | Relapse after Discontinuation Because of Dependence Indicator |
| C163414  | Relationship to Device                   | Relationship to Device   | The relationship of an event to a device, which may or may not be a device under study.                                | Relationship to Device  |
| C170563  | Remaining Amount                         | Remaining Amount   | The quantity of a product that remains after dosing, consumption, or use.  | Remaining Amount  |
| C154861  | Resected Tumor Ind                       | Resected Tumor Ind;Resected Tumor Indicator  | An indication as to whether the tumor has been resected.   | Tumor Resected Indicator                                      |
| C78722   | Returned Amount                          | Returned Amount  | The quantity of a product that has been returned.<br>(NCI)   | Returned Amount   |
| C25676   | Severity/Intensity                       | Severity/Intensity   | The degree of something undesirable.   | Severity  |
| C174281  | Sign/Symptom Leading to Discontinuation  | Sign/Symptom Leading to Discontinuation  | The signs and/or symptoms that result in the discontinuation of treatment or intervention.                             | Sign or Symptom Leading to Discontinuation                    |
| C41146   | Speed                                    | Speed  | A scalar measure of the rate of movement of the object expressed as the distance traveled divided by the elapsed time. | Speed   |
| C123424  | Stent Thrombosis, Coronary, ARC Timing   | Stent Thrombosis, Coronary, ARC Timing   | Categorization of the timing of  | Academic Research Council Coronary Stent Thrombosis Timing    |

| NCI Code | CDISC Submission Value                    | CDISC Synonym   | CDISC Definition  | NCI Preferred Term                                    |
|----------|---|---|---|---|
|          |   |   | coronary stent thrombosis occurrence per the classification schema described by the Academic Research Consortium (ARC).                                 |   |
| C119579  | Stroke Type                               | Stroke Type   | Categorization of the type of stroke.   | Stroke Type   |
| C176285  | Substance Dependence Indicator            | Substance Dependence Indicator  | An indication as to whether an individual has become dependent on a substance.  | Substance Dependence Indicator                        |
| C119241  | Symptom Indicator                         | Symptom Indicator   | An indication as to whether the subject had symptoms related to the clinical event.   | Symptom Indicator                                     |
| C119242  | Symptom Onset Date                        | Symptom Onset Date  | The date time of the onset of symptoms of the clinical event.   | Symptom Onset Date                                    |
| C127787  | Total Number                              | Total Number  | A measurement of the total number of entities.  | Total Number  |
| C172477  | Total Time Paused                         | Total Time Paused   | The total amount of time during which an event, operation or activity has been interrupted or stopped.  | Total Time Paused                                     |
| C172480  | Total Time Physically Active              | Total Time Physically Active  | The total amount of time during which an individual was actively engaged in physical activity.  | Total Time Physically Active                          |
| C82528   | Toxicity Grade                            | Toxicity Grade  | A standardized categorical classification of the severity of an event or finding.   | Toxicity Grade  |
| C124444  | Treatment Setting                         | Treatment Environmental Setting;Treatment Setting                                   | The surroundings or environment within which the subject receives therapeutic treatment for the condition.  | Treatment Environmental Setting                       |
| C174276  | Type of Object                            | Type of Object  | The type of object observed.  | Type of Object  |
| C176284  | Unable to Discontinue Dependent Indicator | Unable to Discontinue Dependent Indicator;Unable to Discontinue Dependent Indicator | An indication as to whether an individual is unable to discontinue the use of a substance due to dependence.  | Unable to Discontinue Use Due to Dependence Indicator |
| C176282  | Unable to Taper Dependent Indicator       | Unable to Taper Dependent Indicator   | An indication as to whether an individual is incapable of reducing or tapering the amount of a substance taken due to dependence.                       | Unable to Taper Dependent Indicator                   |
| C119243  | Vessel Occlusion After CABG 48 Ind        | Vessel Occlusion After CABG 48 Ind  | An indication as to whether vessel occlusion, in the native or bypass graft, occurred within 48 hours after the coronary artery bypass graft procedure. | Vessel Occlusion 48 Hours after CABG Indicator        |
| C74720   | Volume                                    | Volume  | A measurement   | Volume Measurement                                    |

|----------|--|---------------|--|--|
| C42928   | CAPSULE, FILM COATED, EXTENDED RELEASE |               | that drug (or drugs) presented as a conventional dosage form. (NCI)<br>A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or 'shell' made from a suitable form of gelatin; additionally, the capsule is covered in a designated film coating, and which releases a drug (or drugs) in such a manner to allow at least a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form. | Extended Release Film Coated Capsule Dosage Form |
| C42936   | CAPSULE, GELATIN COATED                |               | A solid dosage form in which the drug is enclosed within either a hard or soft soluble container made from a suitable form of gelatin; through a banding process, the capsule is coated with additional layers of gelatin so as to form a complete seal. (NCI)   | Gelatin Coated Capsule Dosage Form               |
| C158214  | CAPSULE, HARD, EXTENDED RELEASE        |               | A capsule, covered with a rigid outer shell, that is designed to release active and/or inert ingredient(s) at a controlled, prolonged rate so as to reduce dosing frequency.   | Extended Release Capsule, Hard Dosage Form       |
| C142247  | CAPSULE, IMMEDIATE RELEASE             |               | A solid dosage form in which the drug is enclosed within either a hard or soft soluble container, which is designed to release its active and/or inert ingredient(s) immediately upon administration.  | Immediate Release Capsule Dosage Form            |
| C42954   | CAPSULE, LIQUID FILLED                 |               | A solid dosage form in which the drug is enclosed within a soluble, gelatin shell which is plasticized by the addition of a polyol, such as sorbitol or  | Liquid Filled Capsule Dosage Form                |

| NCI Code | CDISC Submission Value             | CDISC Synonym | CDISC Definition   | NCI Preferred Term                            |
|----------|------------------------------------|---------------|--|---|
| C184506  | CAPSULE, SOFTGEL                   |               | glycerin, and is therefore of a somewhat thicker consistency than that of a hard shell capsule; typically, the active ingredients are dissolved or suspended in a liquid vehicle. (NCI)  | Capsule Softgel Pharmaceutical Dosage Form    |
| C158215  | CAPSULE, SOFTGEL, EXTENDED RELEASE |               | A capsule, covered with a soft gelatin shell and containing a liquid, suspension, or semisolid, that is designed to release active and/or inert ingredient(s).   | Extended Release Capsule, Softgel Dosage Form |
| C45414   | CEMENT                             |               | A substance that serves to produce solid union between two surfaces. (NCI)   | Cement Dosage Form                            |
| C42678   | CIGARETTE                          |               | A narrow tube filled with material that is capable to burn with release of therapeutically-active substance(s) during the process of smoking. Cigarette is a very efficient drug-delivery inhaler system for fast-acting substances. | Cigarette Dosage Form                         |
| C60884   | CLOTH                              |               | A large piece of relatively flat, absorbent material that contains a drug. It is typically used for applying medication or for cleansing.  | Cloth Dosage Form                             |
| C60891   | CONCENTRATE                        |               | A liquid preparation of increased strength and reduced volume which is usually diluted prior to administration. (NCI)  | Concentrated Dosage Form                      |
| C42900   | CONE                               |               | A solid dosage form bounded by a circular base and the surface formed by line segments joining every   | Cone Dosage Form                              |

| NCI Code | CDISC Submission Value | CDISC Synonym                      | CDISC Definition  | NCI Preferred Term                 |
|----------|------------------------|------------------------------------|---|------------------------------------|
| C42919   | CORE, EXTENDED RELEASE |                                    | point of the boundary of the base to a common vertex. A cone (usually containing antibiotics) is normally placed below the gingiva after a dental extraction. (NCI)   | Extended Release Core Dosage Form  |
| C28944   | CREAM                  |                                    | An ocular system placed in the eye from which the drug diffuses through a membrane at a constant rate over a specified period. (NCI)  | Cream Dosage Form                  |
| C60897   | CREAM, AUGMENTED       |                                    | A semisolid emulsion of either the oil-in-water or the water-in-oil type, ordinarily intended for topical use. (NCI)  | Augmented Cream Dosage Form        |
| C42901   | CRYSTAL                |                                    | A cream dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug in the dosage form. NOTE: CDER has decided to refrain from expanding the use of this dosage form due to difficulties in setting specific criteria that must be met to be considered augmented. | Crystal Dosage Form                |
| C45415   | CULTURE                |                                    | A naturally produced angular solid of definite form in which the ultimate units from which it is built up are systematically arranged; they are usually evenly spaced on a regular space lattice.   | Culture Dosage Form                |
| C106178  | DEPOT                  | Depot Extended Release Dosage Form | The propagation of microorganisms or of living tissue cells in special media conducive to their growth. (NCI)   | Extended Release Depot Dosage Form |
| C47890   | DIAPHRAGM              |                                    | Parenteral sustained-release systems of microparticles, implants, or biodegradable polymer-excipients designed to release their active pharmaceutical ingredient over a prolonged period of time.   | Vaginal Diaphragm Dosage Form      |

| NCI Code | CDISC Submission Value | CDISC Synonym | CDISC Definition   | NCI Preferred Term   |
|----------|------------------------|---------------|--|----------------------|
| C43525   | DISC                   |               | dome-shaped, worn during copulation over the cervical mouth for prevention of conception or infection. (NCI)   | Disc Dosage Form     |
| C42679   | DOUCHE                 |               | A circular plate-like organ or structure.  | Douche Dosage Form   |
|          |                        |               | A liquid preparation, intended for the irrigative cleansing of the vagina, that is prepared from powders, liquid solutions, or liquid concentrates and contains one or more chemical substances dissolved in a suitable solvent or mutually miscible solvents. (NCI)   |                      |
| C42763   | DRESSING               |               | The application of various materials for protecting a wound.   | Dressing Dosage Form |
| C17423   | DRUG DELIVERY SYSTEM   |               | Modern technology, distributed with or as a part of a drug product that allows for the uniform release or targeting of drugs to the body.  | Drug Delivery System |
| C42912   | ELIXIR                 |               | A clear, pleasantly flavored, sweetened hydroalcoholic liquid containing dissolved medicinal agents; it is intended for oral use. (NCI)  | Elixir Dosage Form   |
| C42913   | EMULSION               |               | A dosage form consisting of a two-phase system comprised of at least two immiscible liquids (1), one of which is dispersed as droplets (internal or dispersed phase) within the other liquid (external or continuous phase), generally stabilized with one or more emulsifying agents. Note 1: A liquid is pourable; it flows and conforms to its container at room temperature. It displays Newtonian or pseudoplastic flow behavior. | Emulsion Dosage Form |

| NCI Code | CDISC Submission Value           | CDISC Synonym | CDISC Definition  | NCI Preferred Term                          |
|----------|----------------------------------|---------------|---|---|
|          |                                  |               | Note 2:<br>Emulsion is used as a dosage form term unless a more specific term is applicable, e.g. cream, lotion, ointment. (NCI)  |   |
| C42915   | ENEMA                            |               | A rectal preparation for therapeutic, diagnostic, or nutritive purposes. (NCI)  | Enema Dosage Form                           |
| C42929   | EXTRACT                          |               | A concentrated preparation of vegetable or animal drugs obtained by removal of the active constituents of the respective drugs with a suitable menstrua, evaporation of all or nearly all of the solvent, and adjustment of the residual masses or powders to the prescribed standards. (NCI) | Extract Dosage Form                         |
| C60926   | FIBER, EXTENDED RELEASE          |               | A slender and elongated solid thread-like substance that delivers drug in such a manner to allow a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.   | Extended Release Fiber Dosage Form          |
| C42932   | FILM                             |               | A thin layer or coating. (NCI)  | Film Dosage Form                            |
| C42920   | FILM, EXTENDED RELEASE           |               | A drug delivery system in the form of a film that releases the drug over an extended period in such a way as to maintain constant drug levels in the blood or target tissue. (NCI)  | Extended Release Film Dosage Form           |
| C42984   | FILM, SOLUBLE                    |               | A thin layer or coating which is susceptible to being dissolved when in contact with a liquid. (NCI)  | Soluble Film Dosage Form                    |
| C60927   | FOR SOLUTION                     |               | A product, usually a solid, intended for solution prior to administration.  | Dosage Form for Solution                    |
| C60928   | FOR SUSPENSION                   |               | A product, usually a solid, intended for suspension prior to administration.  | Dosage Form for Suspension                  |
| C60929   | FOR SUSPENSION, EXTENDED RELEASE |               | A product, usually a solid, intended for suspension prior to administration;  | Extended Release Dosage Form for Suspension |

| NCI Code | CDISC Submission Value | CDISC Synonym | CDISC Definition   | NCI Preferred Term         |
|----------|------------------------|---------------|--|----------------------------|
| C42933   | GAS                    |               | once the suspension is administered, the drug will be released at a constant rate over a specified period.<br>Any elastic aeriform fluid in which the molecules are separated from one another and have free paths. (NCI)  | Gas Dosage Form            |
| C42934   | GEL                    |               | A semisolid (1) dosage form that contains a gelling agent to provide stiffness to a solution or a colloidal dispersion (2). A gel may contain suspended particles. Note 1: A semisolid is not pourable; it does not flow or conform to its container at room temperature. It does not flow at low shear stress and generally exhibits plastic flow behavior. Note 2: A colloidal dispersion is a system in which particles of colloidal dimension (i.e., typically between 1 nm and 1 micrometer) are distributed uniformly throughout a liquid. | Gel Dosage Form            |
| C134876  | GEL, CHEWABLE          | Gummie;Gummy  | A formed or molded oral gel dosage form that maintains its shape, is elastic, and yields to mastication. (NCI)   | Chewable Gel Dosage Form   |
| C42906   | GEL, DENTIFRICE        |               | A combination of a dentifrice (formulation intended to clean and/or polish the teeth, and which may contain certain additional agents), and a gel. It is used with a toothbrush for the purpose of cleaning and polishing the teeth. (NCI)   | Dentifrice Gel Dosage Form |
| C60930   | GEL, METERED           |               | A gel preparation, with metered dose valves, which allow for the delivery of a uniform quantity of gel upon each activation.   | Metered Gel Dosage Form    |
| C48193   | GENERATOR              |               | An apparatus for the formation of  | Generator Dosage Form      |

|----------|--------------------------|---------------|---|-------------------------------------|
| C42937   | GLOBULE                  |               | vapor or gas from a liquid or solid by heat or chemical action. The term GENERATOR also applies to radioactive columns from which radionuclides are provided. (NCI)<br>Also called pellets or pilules, are made of pure sucrose, lactose, or other polysaccharides. They are formed into small globular masses of various sizes, and are medicated by placing them in a vial and adding the liquid drug attenuation in the proportion not less than one percent (v/w). After shaking, the medicated globules are dried at temperatures not to exceed 40 degrees Centigrade. (NCI) | Globule Dosage Form                 |
| C45416   | GRAFT                    |               | A slip of skin or of other tissue for implantation. (NCI)   | Graft Dosage Form                   |
| C42938   | GRANULE                  |               | A small particle or grain. (NCI)  | Granule Dosage Form                 |
| C42903   | GRANULE, DELAYED RELEASE |               | A small medicinal particle or grain to which an enteric or other coating has been applied, thus delaying release of the drug until its passage into the intestines. (NCI)   | Delayed Release Granule Dosage Form |
| C42909   | GRANULE, EFFERVESCENT    |               | A small particle or grain containing a medicinal agent in a dry mixture usually composed of sodium bicarbonate, citric acid, and tartaric acid which, when in contact with water, has the capability to release gas, resulting in effervescence. (NCI)  | Effervescent Granule Dosage Form    |
| C42939   | GRANULE, FOR SOLUTION    |               | A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing; the granules are so  | Granule for Solution Dosage Form    |

| NCI Code | CDISC Submission Value                    | CDISC Synonym | CDISC Definition   | NCI Preferred Term                                  |
|----------|---|---------------|--|---|
| C42940   | GRANULE, FOR SUSPENSION                   |               | prepared to contain not only the medicinal agent, but the colorants, flavorants, and any other desired pharmaceutical ingredient. (NCI)<br>A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing to form a suspension; the granules are so prepared to contain not only the medicinal agent, but the colorants, flavorants, and any other desired pharmaceutical ingredient. (NCI) | Granule for Suspension Dosage Form                  |
| C42921   | GRANULE, FOR SUSPENSION, EXTENDED RELEASE |               | A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing to form a suspension; the extended release system achieves slow release of the drug over an extended period of time and maintains constant drug levels in the blood or target tissue. (NCI)  | Extended Release Granule for Suspension Dosage Form |
| C42941   | GUM                                       |               | A mucilaginous excretion from various plants. (NCI)  | Gum Dosage Form                                     |
| C42894   | GUM, CHEWING                              |               | A sweetened and flavored insoluble plastic material of various shapes which when chewed, releases a drug substance into the oral cavity. (NCI)   | Chewing Gum Dosage Form                             |
| C42978   | GUM, RESIN                                |               | Natural mixture of gum and resin, usually obtained as exudations from plants. (NCI)  | Resin Gum Dosage Form                               |
| C42942   | IMPLANT                                   |               | A material containing drug intended to be inserted securely and deeply in a living site for growth, slow release, or formation of an organic union. (NCI)  | Implant Dosage Form                                 |

| C66726   |                                   | FRM                    |  |  |
|----------|-----------------------------------|------------------------|--|--|

| C42944   | INHALANT                          |                        | A special class of inhalations consisting of a drug or combination of drugs, that by virtue of their high vapor pressure, can be carried by an air current into the nasal passage where they exert their effect; the container from which the inhalant generally is administered is known as an inhaler. (NCI) | Inhalant Dosage Form                         |
| C149582  | INHALATION VAPOR, CAPSULE         | Capsule for Inhalation | Solid preparation consisting of a capsule formulation intended for generation of vapor to be inhaled to obtain a local effect. The vapor is usually generated by adding the whole capsule or the capsule contents to hot water. (EDQM)   | Inhalation Vapor, Capsule Dosage Form        |
| C60931   | INJECTABLE, LIPOSOMAL             |                        | An injection, which either consists of or forms liposomes (a lipid bilayer vesicle usually composed of phospholipids which is used to encapsulate an active drug substance).   | Liposomal Injection Dosage Form              |
| C42946   | INJECTION                         |                        | A sterile preparation intended for parenteral use; five distinct classes of injections exist as defined by the USP. (NCI)  | Injectable Dosage Form                       |
| C42914   | INJECTION, EMULSION               |                        | An emulsion consisting of a sterile, pyrogen-free preparation intended to be administered parenterally.  | Emulsion for Injection Dosage Form           |
| C42950   | INJECTION, LIPID COMPLEX          |                        | A substance composed of complexed active and/or inert ingredient(s) with natural or synthetic lipids that is intended for injection. (NCI)   | Injectable Lipid Complex Dosage Form         |
| C42974   | INJECTION, POWDER, FOR SOLUTION   |                        | A sterile preparation intended for reconstitution to form a solution for parenteral use. (NCI)   | Powder for Injectable Solution Dosage Form   |
| C42976   | INJECTION, POWDER, FOR SUSPENSION |                        | A sterile preparation intended for reconstitution to form a suspension for   | Powder for Injectable Suspension Dosage Form |

| C42951   | INJECTION, SUSPENSION, LIPOSOMAL |               | releasing, conventional solid dosage form). (NCI)<br>A liquid parenteral pharmaceutical dosage form structured as a multilamellar composition of concentric phospholipid spheres that encapsulate the drug (drug delivery systems) separated by layers of water. Drug release is facilitated and controlled by in vivo erosion of the liposomes. To further increase the in vivo circulation time, liposomes in some preparations are covalently derivatized with PEG to produce PEGylated or stealth liposomes. Covalent attachment of drugs to the outer surface of liposomes can potentially serve as a delayed-release product. (NCI) | Injectable Liposomal Suspension Dosage Form |
| C42988   | INJECTION, SUSPENSION, SONICATED |               | A liquid preparation, suitable for injection, which consists of solid particles dispersed throughout a liquid phase in which the particles are not soluble. In addition, the product is sonicated while a gas is bubbled through the suspension, and this results in the formation of microspheres by the solid particles. (NCI)  | Injectable Sonicated Suspension Dosage Form |
| C60933   | INSERT                           |               | A specially formulated and shaped non-encapsulated solid preparation intended to be placed into a non-rectal orifice of the body, where drug is released, generally for localized effects.  | Insert Dosage Form                          |
| C42922   | INSERT, EXTENDED RELEASE         |               | A specially formulated and shaped solid preparation (e.g., ring, tablet, or stick) intended to be placed in the vagina by   | Extended Release Insert Dosage Form         |
