| C50996   | PROTOCOL DEVIATION                          |   |               | A variation from processes or procedures defined in a protocol. Deviations usually do not preclude the overall evaluability of subject data for either efficacy or safety, and are often acknowledged and accepted in advance by the sponsor. NOTE: Good clinical practice recommends that deviations be summarized by site and by category as part of the report of study results so that the possible importance of the deviations to the findings of the study can be assessed. Compare to protocol violation. [See ICH E3] (CDISC Glossary) | Protocol Deviation                          |
| C142185  | PROTOCOL VIOLATION                          |   |               | A significant departure from processes or procedures that were required by the protocol. Violations often result in data that are not deemed evaluable for a per-protocol analysis, and may require that the subject(s) who violate the protocol be discontinued from the study. Compare to protocol deviation. (CDISC Glossary)  | Protocol Violation                          |
