<td>IU</td>
<td>IE;International Unit</td>
<td>The unitage assigned by the WHO (World Health Organization) to International Biological Standards - substances, classed as biological according to the criteria provided by WHO Expert Committee on Biological Standardization, to enable the results of biological and immunological assay procedures to be expressed in the same way throughout the world. The definition of an international unit is generally arbitrary and technical, and has to be officially approved by the International Conference for Unification of Formulae.(NCI)</td>

C136153   PODC1328
PODC13-Stand Washing Hands at a Sink
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Stand while washing your hands and face at a sink?
PODCI Adolescent Self-Reported Version - Stand Washing Hands at a Sink

C136154   PODC1329
PODC13-Sit in Chair Without Holding On
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Sit in a regular chair without holding on?
PODCI Adolescent Self-Reported Version - Sit in Chair Without Holding On

C136155   PODC1330
PODC13-Get On and Off a Toilet or Chair
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Get on and off a toilet or chair?
PODCI Adolescent Self-Reported Version - Get On and Off a Toilet or Chair

C136156   PODC1331
PODC13-Get In and Out of Bed
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Get in and out of bed?
PODCI Adolescent Self-Reported Version - Get In and Out of Bed

C136157   PODC1332
PODC13-Turn Door Knobs
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Turn door knobs?
PODCI Adolescent Self-Reported Version - Turn Door Knobs

C136158   PODC1333
PODC13-Bend Over and Pick Up Something
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - During the last week, has it been easy or hard for you to: Bend over from a standing position and pick up something off the floor?
PODCI Adolescent Self-Reported Version - Bend Over and Pick Up Something

C136159   PODC1334
PODC13-Need Help Sitting and Standing
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - How often do you need help from another person for sitting and standing?
PODCI Adolescent Self-Reported Version - Need Help Sitting and Standing

C136160   PODC1335
PODC13-Use Assistive Devices for Sitting
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - How often do you use assistive devices (such as braces, crutches, or wheelchair) for sitting and standing?
PODCI Adolescent Self-Reported Version - Use Assistive Devices for Sitting

C136161   PODC1336
PODC13-Participate in Outdoor Activities
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - Can you participate in recreational outdoor activities with other kids the same age (For example: bicycling, skating, hiking, jogging)?
PODCI Adolescent Self-Reported Version - Participate in Outdoor Activities

C136162   PODC1337
PODC13-Outdoor Limited by: Pain
Pediatric Outcomes Data Collection Instrument, Adolescent Self-Reported - If you answered "no" to Question 36 above, was your activity limited by: Pain?
PODCI Adolescent Self-Reported Version - Outdoor Limited by: Pain

---

**Table Notes:**

- **NCI Code:** Unique identifier for the position.
- **CDISC Submission Value:** The value used in CDISC submissions.
- **CDISC Synonym:** An alternative term for the position.
- **CDISC Definition:** Description of the position as defined in CDISC.
- **NCI Preferred Term:** The term preferred by NCI.

---

**Example Definitions:**

- **Recumbent:** Lying down with the head elevated.
- **Prone:** Lying facedown on a bed.
- **Supine:** Lying facedown with the head elevated.
- **Sitting:** Sitting upright with the body in an upright position.
- **Standing:** Standing upright with the body in an upright position.

<td>C119598</td>
<td>STENT THROMBOSIS ARC GRADE DEFINITE</td>
<td>Includes acute ischemic symptoms at rest, acute post ischemic ECG, positive biomarkers and pathological evidence. Definite stent thrombosis is considered to have occurred when there is either angiographic or pathological confirmation. Angiographic confirmation is the presence of a thrombus at coronary angiography that originates in the stent or in the segment 5 mm proximal or distal to the stent, with the presence of at least 1 of 3 clinical criteria within a 48-hour time window: 1) acute onset of ischemic symptoms at rest; 2) new ischemic ECG changes that suggest acute ischemia; or 3) typical rise and fall in cardiac biomarkers. Pathological confirmation is evidence of recent thrombus within the stent determined at autopsy or via examination of tissue retrieved following thrombectomy. (Cutlip DE, Windecker S, Mehran R, et al. Clinical End Points in Coronary Stent Trials : A Case for Standardized Definitions. Circulation. 2007;115:2344-2351)</td>

<td>PHASE 0 TRIAL</td>
<td>0;Pre-clinical Trial;Trial Phase 0</td>
<td>First-in-human trials, in a small number of subjects, that are conducted before Phase 1 trials and are intended to assess new candidate therapeutic and imaging agents. The study agent is administered at a low dose for a limited time, and there is no therapeutic or diagnostic intent. NOTE: FDA Guidance for Industry, Investigators, and Reviewers: Exploratory IND Studies, January 2006 classifies such studies as Phase 1. NOTE: A Phase 0 study might not include any drug delivery but may be an exploration of human material from a study (e.g., tissue samples or biomarker determinations). [Improving the Quality of Cancer Clinical Trials: Workshop summary-Proceedings of the National Cancer Policy Forum Workshop, improving the Quality of Cancer Clinical Trials (Washington, DC, Oct 2007)] (CDISC glossary)</td>
<td>Phase 0 Trial</td>
</tr>
<tr>
<td>C15600</td>
<td>PHASE I TRIAL</td>
<td>1;Trial Phase 1</td>
<td>The initial introduction of an investigational new drug into humans. Phase 1 studies are typically closely monitored and may be conducted in patients or normal volunteer subjects. NOTE: These studies are designed to determine the metabolism and pharmacologic actions of the drug in humans, the side effects associated with increasing doses, and, if possible, to gain early evidence on effectiveness. During Phase 1, sufficient information about the drug's pharmacokinetics and pharmacological effects should be obtained to permit the design of well-controlled, scientifically valid, Phase 2 studies. The total number of subjects and patients included in Phase 1 studies varies with the drug, but is generally in the range of 20 to 80. Phase 1 studies also include studies of drug metabolism, structure-activity relationships, and mechanism of action in humans, as well as studies in which investigational drugs are used as research tools to explore biological phenomena or disease processes. <tr>
<td>C127796</td>
<td>Planned Trial Duration</td>
<td>Planned Trial Duration</td>
<td>The approximate period of time over which the clinical trial is expected to occur.</td>
</tr>
<tr>
<td>C139275</td>
<td>Post Authorization Safety Study Ind</td>
<td>Post Authorization Safety Study Ind</td>
<td>An indication as to whether the clinical study is a post authorization safety study.</td>
</tr>
<tr>
<td>C98772</td>
<td>Primary Outcome Measure</td>
<td>Primary Outcome Measure</td>
<td>The outcome measure(s) of greatest importance specified in the protocol, usually the one(s) used in the power calculation, to evaluate the primary endpoint(s) associated with the primary study objective(s). (After Clinicaltrials.gov)</td>
</tr>
<tr>
<td>C126062</td>
<td>Protocol Keyword</td>
<td>Protocol Keyword</td>
<td>A word or small set of words designed to convey the focus of the protocol.</td>
</tr>
<tr>
<td>C139277</td>
<td>Protocol Risk Assessment</td>
<td>Protocol Risk Assessment</td>
<td>The potential future harm that may arise from a protocol-related activity.</td>
</tr>
<tr>
<td>C127797</td>
<td>PubMed ID for Citation Used in Study</td>
<td>PubMed ID for Citation Used in Study</td>
<td>A globally unique identifier for a biomedical article, as assigned by PubMed.</td>
</tr>
<tr>
<td>C98775</td>
<td>Randomization Quotient</td>
<td>Randomization Quotient</td>
<td>The randomization quotient is the number of planned subjects to be exposed to investigational therapy, independent of dose or other factors, divided by the total number of planned subjects.</td>
</tr>
<tr>
<td>C126070</td>
<td>Rare Disease Indicator</td>
<td>Rare Disease Indicator</td>
<td>An indication as to whether the condition under study is considered a rare disease.</td>
</tr>
<tr>
<td>C98714</td>
<td>Registry Identifier</td>
<td>Registry Identifier</td>
<td>Identification numbers assigned to the protocol by clinicaltrials.gov, EudraCT, or other registries.</td>
</tr>
<tr>
<td>C117961</td>
<td>Relapse Criteria</td>
<td>Relapse Criteria</td>
<td>A standard from which a judgment concerning a disease relapse can be established.</td>

<td>Degree Celsius</td>
<td>A unit of temperature of the temperature scale designed so that the freezing point of water is 0 degrees and the boiling point is 100 degrees at standard atmospheric pressure. The current official definition of the Celsius sets 0.01 C to be at the triple point of water and a degree to be 1/273.16 of the difference in temperature between the triple point of water and absolute zero. One degree Celsius represents the same temperature difference as one Kelvin. (NCI)</td>
<td>Degree Celsius</td>
</tr>
